Fondul Proprietatea

Two corporate actions with a cumulated return potential to investors of at least 13.5% need assets sale of RON 953m

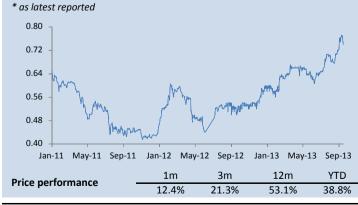

We update our view on Fondul Proprietatea with a NEUTRAL recommendation and a target price adjusted for corporate actions of RON 0.8761 per share revealing a total return potential of 26% out of which 14% represents corporate actions return.

- * Financial Supervisory Authority (FSA) approved the Fund's proposal for own shares tender offer designed to accelerate the buy-back program. **Shares offered: 600m **Offer price: RON 1.0/share **Offer period: Oct 15 Nov 4 **Allocation method: pro-rata.
- ** The approved 600m shares buy-back programme will reduce the Fund's cash by RON 600m bringing the investors at least an average return of 6.4% if ahead of FSA approval close of RON 0.74/share considered. After the approval, FP RO closed at RON 0.777/share, 5% up from previous day, reducing the discount to NAV from 37% to 34%.
- * If we incorporate also RON 0.05/share proposed to be returned to investors (RON 677m) through the share capital decrease, cumulated investors return will raise to 13.5%. Please be remembered that on the E&OGSM of the 22nd of Nov, subject to shareholders approval will be the Fund' share capital reduction by decreasing the nominal value with RON 0.05/share that will be returned to investors proportionally with their participation to the paid share capital. The share capital decrease shall be effective within two months from the publication in the Official Gazette of the GSM's resolution.
- * The two corporate actions will necessitate RON 1,277m in cash by the end of Jan 2014. Based on the latest reported cash position of RON 324m, by the beginning of 2014, the Fund will be short of RON 953m if no other assets liquidised. First in the line for sale could be the Gov't securities of RON 580m as reported by the end of Aug. Still, RON 372m will be missing and further holdings liquidation will probably appear on the Fund's agenda.
- * Romgaz 15% stake IPO could start on 18th 19th October, faster than scheduled, as sources in the capital market stated. Our preliminary valuation indicates a fair value of EUR 3b for Romgaz and of EUR 457m for FP's 15% stake in the company. Next week we will follow up with a complete report on Romgaz although the prospectus was not published yet. After applying a 15% listing discount and a 15% liquidity discount, we add Romgaz stake in FP's portfolio at EUR 320m (+7% vs. reported value)

^{*} Discounted value of the listed companies: 15% liquidity discount to market value at last close

^{**} Discounted value of the unlisted companies: 15% listing discount to Swiss Capital valuation to which a 15% liquidity discount is added (30% discount to Swiss Capital valuation)

DISCLOSURE SECTION

Analysts Certification

The research analyst(s) undersigned and responsible for the preparation of this report hereby certify (-ies) that i) the views expressed in this research report accurately reflect their personal views about any and all of the securities or issuers referred to in this research report, ii) no part of the analyst's compensation was, is, or will be, directly or indirectly related to the specific recommendations or views expressed in this research report and iii) no part of their compensation is tied to any specific investment banking transactions performed by Swiss Capital SA.

Stocks Ratings

Stock recommendations are based on absolute valuation upside (downside), which is defined as (Fair Value - Current Price)/Current Price, subject to limited management discretion. In most cases, the Fair Value will equal the analyst's assessment of the current intrinsic fair value of the stock using an appropriate valuation methodology such as Discounted Cash Flow etc. However, if the analyst doesn't think the market will revalue the stock over the specified time horizon due to a lack of events or catalysts, then the fair value may differ from the intrinsic fair value. In most cases, therefore, our recommendation is an assessment of the difference between current market price and our estimate of current intrinsic fair value. Recommendations are set with a 6-12 month horizon unless specified otherwise. Accordingly, within this horizon, price volatility may cause the actual upside or downside based on the prevailing market price to differ from the upside or downside implied by the recommendation.

A "STRONG BUY" recommendation indicates that upside is more than 30%.

A "BUY" recommendation indicates that upside is between 15% and 30%.

A "NEUTRAL" recommendation indicates that upside or downside is less than 15%.

A "SELL" recommendation indicates that downside is more than 15%.

Company Specific Regulatory Disclosures

The following disclosures relate to relationships between Swiss Capital SA and companies covered by the Research Division of Swiss Capital and mentioned in this research.

Mentioned companies

| Company | BSE | Rating | Price | Price date | Disclosure |
|---------------------|-----|---------|--------|------------|------------|
| Fondul Proprietatea | FP | NEUTRAL | 0.7770 | 10/10/2013 | NONE |
