Administrator's Letter to Shareholders

Dear Shareholders,

2011 was an overall successful, but challenging, year for Fondul Proprietatea and the Fund's shareholders. During the first year of our mandate as Fund Manager and Sole Administrator of the Fund, our main focus was to protect the value of the underlying holdings of the Fund through active management and supervision of the portfolio companies, and to implement several key, value-creating corporate actions.

In 2011, despite the difficult market conditions, the total return on the net assets of the Fund was of -0.5%. The Fund reported a Net Asset Value ("NAV") of RON 14,465.4 million and a NAV per share of RON 1.0788 as at 31 December 2011.

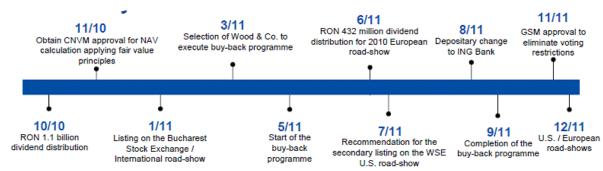

The downward trend of the Fund's NAV performance in the second half of 2011 was correlated with the overall conditions on the Bucharest Stock Exchange ("BVB"), which impacted the valuation of the listed holdings in the Fund's portfolio. In 2011, the Bucharest Stock Exchange performed better than the largest markets in Central Europe, as shown in the table below:

% change in 2011	in local currency	in EUR
BET-XT (Romania)	-13.8%	-14.5%
PX (Czech Republic)	-25.6%	-26.6%
BUX (Hungary)	-20.4%	-29.7%
WIG20 (Poland)	-21.9%	-30.7%
ATX (Austria)	-34.9%	-34.9%

We provide details on the portfolio management on a monthly basis via fact sheets and also in quarterly reporting. We encourage you to read the full details given in the section Analysis of the Portfolio of the Fund.

The Fund's 2011 audited net profit was RON 543.8 million, an increase of almost 20% or RON 87.6 million compared to the net profit for 2010 of RON 456.2 million. As a result, we intend to recommend to shareholders a gross dividend of RON 0.03854 per share arising from 2011 profits, based on the dividend policy stated in the Fund's listing prospectus. Subject to shareholders' approval, the distribution of dividends is expected to start in June 2012.

Key Achievements

Some of the key objectives achieved in 2011 included:

- January: Listing the Fund on the Bucharest Stock Exchange and organizing the first international road-show, which put Romania back on the radar screens of large foreign institutional investors;
- March: Completed the first step in the implementation of the first share buy-back programme, by selecting Wood & Co. to execute the buy-back programme;
- May: Started the buy-back programme;
- June: Distributed the 2010 dividend of RON 432.7 million (RON 0.03141 per share), which represented the second distribution to the Fund's shareholders since taking over as Fund Manager. In total, RON 1.5 billion (RON 0.1130 per share) was paid out to the Fund's shareholders in less than nine months. At the same time, we organized a road-show in Europe to update investors on the latest developments of the Fund;
- July: Began investigating the options for a secondary listing of the Fund on the Warsaw Stock Exchange. We also continued our efforts to ensure widespread understanding of the Fund by organizing a road-show in the United States;
- August: Completed a selection process for the new Depositary of the Fund upon the expiration of the contract with Bancpost. ING Bank became the Depositary of the Fund on 18 August;
- September: Completed the buy-back programme;
- November: Shareholders' approval to eliminate the voting restrictions. The decision became effective on 13 January 2012;
- December: U.S. and European road-shows.

First Year after Listing on the Bucharest Stock Exchange

The Fund was listed on the Bucharest Stock Exchange on 25 January 2011; the benefits arising from the listing included:

- The Fund had the largest free float on the BVB at RON 5.7 billion (EUR 1.3 billion) as at 31 December 2011;
- 9.97 billion shares of the Fund were traded on the BVB in 2011, equivalent to over 74% of the Fund's paid share capital. During the fourth quarter, 1.8 billion shares of the Fund were traded on the BVB, compared to 3.6 billion shares in the third quarter and 2.3 billion shares in the second quarter. The value of all trades in the Fund's shares exceeded RON 5.1 billion (EUR 1.2 billion);

- The listing of the Fund on the BVB has attracted large foreign institutional investors to the Fund; these investors increased their holdings in Fondul Proprietatea from 10% at the end of 2010 to over 42% of the paid share capital by the end of 2011. During the last quarter of 2011, foreign institutional holdings increased by over 6 percentage points (over 840 million shares);
- The listing of the Fund led to a doubling of the average daily turnover on the BVB in 2011 in comparison to 2010. Fondul Proprietatea was by far the most traded share on the exchange with an average daily value amounting to 54% of the average daily turnover of the BVB in 2011.

Investor Relations Update

In order to raise the Fund's profile and visibility among a broader international institutional investor base, and to ensure a broad understanding of the Fund's underlying portfolio, we organized several events during 2011, including: a Romanian Day in London (April) in partnership with the Bucharest Stock Exchange; three extensive road-shows in the main financial centres of Europe (January, June, and December) plus two in the US (July and December); and participated in five global and regional emerging market conferences to continue to update investors about Fondul Proprietatea. In addition to the quarterly results conference calls held in May, August, and November, we organised an Investors' Day event in October for analysts and institutional investors to meet with our team as well as the management teams of the top portfolio companies, and organised site visits to Hidroelectrica and Nuclearelectrica.

One of the key objectives for 2011 was to increase transparency at the portfolio level. The Fund published the annual reports, detailed financial statements and auditors' reports for its top 20 portfolio companies, which account for almost 90% of the NAV, in order to facilitate a deeper understanding of the intrinsic value of the underlying holdings.

Communication with investors remains a top priority in order to ensure that they are informed about the latest developments. We will also continue to seek their feedback as we strive to maximise shareholder value.

Secondary Listing Update

In July 2011, after detailed analysis and following discussions with eight leading investment banks, we announced our recommendation for the secondary listing of the Fund on the Warsaw Stock Exchange (the "WSE") in early 2012. In order to progress with the preparation of a proposal to list the Fund on the WSE, we initiated the selection process for the investment banks interested in sponsoring the transaction and met with the market regulators in Romania and Poland as well as the central depositaries in Bucharest and Warsaw.

To facilitate investor demand, we recommended that the secondary listing should be combined with an offering of up to 10% of the existing shares of the Fund, and various methods to accumulate the shares for the placement were considered, including acquiring shares through a tender offer, a buyback or by other means. The feasibility of applying these innovative methods is dependent on positive interpretation of the Romanian laws and regulations from the CNVM. Given that such structures have not been previously applied to a similar transaction in Romania, based on initial feedback received from CNVM, it appears that there are more obstacles than previously envisaged. However, discussions are ongoing and we remain committed to working with the regulator to reach a positive outcome. We expect to give further updates on the project in the first half of 2012.

The secondary listing transaction would be a major step forward for the development of the Fund and we believe it is in the best long-term interest of all shareholders. In addition, the secondary listing would be a major milestone in the development of the Romanian market as it would increase coverage from analysts, attract a diversified pool of institutional investors, raise awareness and understanding of the Fund and also of the portfolio companies listed on the Romanian market.

Buy-Back Programme

At the September 2010 General Shareholders Meeting, the Fund's shareholders authorised us to repurchase up to 10% of the outstanding shares before 1 March 2012, at a price per share within the RON 0.2 to RON 1.5 range. The Fund only had RON 120.3 million in available reserves to use for the share buy-backs (this figure derives from the 31 December 2010 financial statements prepared in accordance with Romanian Accounting Regulations).

In an effort to enhance the intrinsic value per share of the Fund, we initiated the buy-back programme in the first half of 2011 and had completed it by the end of the third quarter. During the programme, 240.3 million shares, equivalent to 1.74% of the Fund's share capital were repurchased, at an average price of RON 0.4994, for a total amount of RON 120.3 million.

At the General Shareholders Meetings on 23/25 November 2011, we proposed to cancel the treasury shares, but the proposal was not voted on due to the lack of a quorum (attendance of at least 50% of the paid share capital is required for such a decision). The proposal to cancel these shares will be carried forward to the 2012 shareholders meetings.

Outlook for 2012

Romania has already taken its 'bitter medicine' applied by the International Monetary Fund ("IMF") and, as a result, is well positioned to experience accelerated growth in the coming years. Of course, 2012 can still be challenging due to the problems in the eurozone, but once these problems ease, the Romanian economy could well be the first to emerge from the European crisis with strong economic growth. Most of the other EU countries have yet to apply the difficult measures that Romania has already undertaken.

This state of affairs has been recognized by rating agencies with Fitch upgrading Romania this year from BB+ to BBB-⁸ while many EU countries suffered serious downgrades.

We also see an appreciation to Romania's sound financial situation in the credit default swap (CDS) market, where the Romanian spread has improved significantly compared to other countries in the region.

Country	CDS (5y USD segment as at 13 February 2012)
Romania	378
Bulgaria	323
Hungary	555
Italy	400
Greece	6,531

Potential drivers of GDP growth in 2012 are retail sales (currently at a low base as it has declined by 20% from its peak in December 2008⁹) and important infrastructure projects (approximately EUR 10 billion of new contracts/tenders¹⁰). These should help to offset a potentially weaker contribution from the country's exports. Overall, based on Government and IMF's forecasts, GDP should grow by 1.75%-2.25% in 2012.¹¹

The Romanian currency (RON) has already showed its relative strength this year when it outperformed almost all major regional currencies including those of Poland, Hungary, Czech Republic and Turkey¹². In 2012 we expect a further relative strengthening of the RON.

For the capital markets, we hope that 2012 will be an even more exciting year than 2011, when closed-end investment company Fondul Proprietatea was listed and immediately became by far the most liquid company on the Bucharest Stock Exchange. In addition, we hope to see a number of secondary offerings including Petrom, Transelectrica and Transgaz and most importantly, the IPOs of Romgaz, Hidroelectrica and Nuclearelectrica progressing or coming to fruition. These transactions, if successful, should also have a positive impact on the Fund's portfolio, significantly increasing the proportion of listed companies in the portfolio.

Last but not least, we anticipate that the elections of 2012 may be somewhat disruptive to the process of reform and may create some degree of uncertainty but in the long-term, we believe the elections will strengthen democracy.

Unlocking Value: The Next Steps

While 2011 was a successful year in terms of protecting the value of the underlying holdings in the Fund's portfolio, 2012 should be the year of unlocking that value. The listings of the larger state-owned enterprises, the professional management to be selected to enhance the profitability of these assets, and the successful enforcement of the new corporate governance code are all important actions we can look forward to this year.

At the same time, we will continue to actively manage the Fund's portfolio, which may bring material changes to its structure. We will continue to promote the Fund and the Romanian capital market to prospective and current investors, and to work towards the listing the Fund on the Warsaw Stock Exchange.

In addition, we will continue to monitor how closely the level of the Fund's Net Asset Value is reflected in the share price and, where appropriate recommend further actions to create more value for the Fund's shareholders.

We are confident that our active, bottom-up investment process will allow us to deliver the best long-term results for our shareholders and we look forward to the opportunities ahead for Fondul Proprietatea.

General Shareholders Meeting

Last but not least, we would like to take this opportunity to invite all shareholders to attend the General Shareholders Meeting to be held in Bucharest, at the Radisson Blu Hotel on Wednesday, 25 April 2012.

Analysis of the Activity of the Fund

General Information

Main activities of Fondul Proprietatea

Fondul Proprietatea is a Romanian legal entity, incorporated as a joint stock closed-end investment company. The Fund is registered with the CNVM in the category "Other Organizations for Collective Investments – AOPC" and has been listed on the regulated market of the BVB since 25 January 2011.

The main activities of the Fund according to the National Statistical Classification of Economic Activities in Romania ("CAEN") and the Fund's own Constitutive Act are the business of operating mutual funds and other similar financial entities (CAEN reference 643) and the main activity is financial investments (CAEN reference 6430).

Incorporation of the Fund

The Fund was incorporated by the Romanian State in 2005 as a joint stock company with the initial purpose of providing compensation to individuals whose real property assets were illegally confiscated by the Romanian State during the Communist regime, and which can no longer be returned to those individuals in kind.

The Fund's original Constitutive Act was enacted by Government Decision no. 1481/2005 regarding the incorporation of S.C. Fondul Proprietatea S.A. ("Government Decision 1481"), which determined that the Fund would be an undertaking for collective investments organised as a closed-end investment company. However, the Fund was only officially registered by the National Securities Commission ("CNVM") as a closed-end investment company in 2010 (by CNVM decision no. 34/18 August 2010).

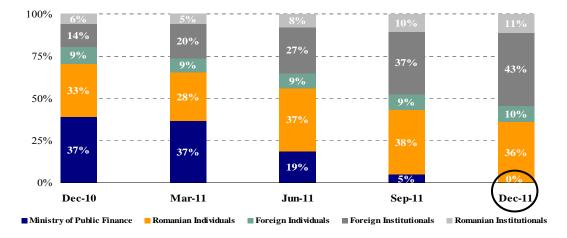

The initial sole shareholder of the Fund was the Romanian State. Since the Fund's launch, these shares have been gradually awarded by the National Authority for Property Restitution to individuals legally entitled to receive compensation from the Romanian State and who elected to convert their compensation entitlements into shares issued by the Fund. As a result, given that the compensation and conversion process is ongoing, the Romanian State's participation in the share capital of the Fund is continually decreasing.

Employees of the Fund

As at 31 December 2011 the Fund had only one employee, who is on child care leave. Given that the Fund is administrated by the Fund Manager, it is envisaged that in future the Fund will not have any employee. The termination of the remaining employee's contract will be carried out according to Romanian legislation. The Fund's employee is not a member of a trade union. There were no disputes between the Fund Manager and employees during the year.

Share Capital

The evolution of the shareholder structure during the year is illustrated by the following chart:

The shareholder structure as at 31 December 2011 was as follows:

Shareholder Categories	% of subscribed share capital
Foreign institutional shareholders	42.14%
Romanian private individuals	34.89%
Foreign private individuals	9.37%
Romanian institutional shareholders	9.15%
Ministry of Public Finance	0.02%
Treasury shares ¹³	1.74%
Unpaid shares ¹⁴	2.69%

Changes Affecting the Capital of the Fund:

At the beginning of the year, the subscribed capital of the Fund was RON 13,778,392,208, and the paid-up capital was the same.

During 2011, there were some changes in the number of Fund's shares corresponding to paid-in share capital as follows:

- The Fund Manager issued the Decision 24/31 May 2011 and confirmed that the shareholder Romanian State represented by the Ministry of Public Finance did not fulfil the obligation of the transfer of 1,002,301 shares of Electromecanica Ploiesti SA, subsidiary of CN Romarm, to the Fund, evaluated at RON 21,436,245.
- The Fund Manager issued the Decision 34/23 August 2011 and acknowledged that the Romanian State consented to compensate the amount of RON 9,730,381 representing the amounts recovered from the forced execution of SC World Trade Center SA and from the increase of share capital of SC Plafar SA with the amount of RON 21,436,245 (representing the value of 21,436,245 shares of the Fund unpaid by the Romanian State represented by the Ministry of Public).
- The Fund Manager issued the Decision 35/23 August 2011 and confirmed that the shareholder Romanian State represented by the Ministry of Public Finance did not fulfil the obligation of the transfer of 2,951,053 shares of Uzina Mecanica Bucuresti SA, subsidiary of CN Romarm, to the Fund, evaluated at RON 20,024,890.
- The Fund Manager issued the Decision 36/23 August 2011 and confirmed that the shareholder Romanian State represented by the Ministry of Public Finance did not fulfil the obligation of the transfer of 19,226,031 shares of Nuclearelectrica to the Fund, with a value of RON 340,796,918.
- The Fund Manager issued the Decision 51/23 December 2011 and acknowledged that the Romanian State consented to compensate the amount of RON 1,704,560, representing the nominal value of the 170,456 shares in Hidroelectrica SA received by the Fund free of charge, according to GEO 81/2007 during 2011.

As a result of the five decisions above, the subscribed capital of the Fund remained unchanged at RON 13,778,392,208 and the paid-up capital decreased by RON 370,823,112 to RON 13,407,569,096.

Analysis of the Portfolio of the Fund

Net Asset Valuation

The key performance indicator of the Fund is its Net Asset Value ("NAV"). The Fund is required to publish a monthly NAV per share in accordance with CNVM regulations no later than 15 calendar days after the reporting month end.

All NAV reports are published on the Fund's website at <u>www.fondulproprietatea.ro</u>, together with share price and discount information.

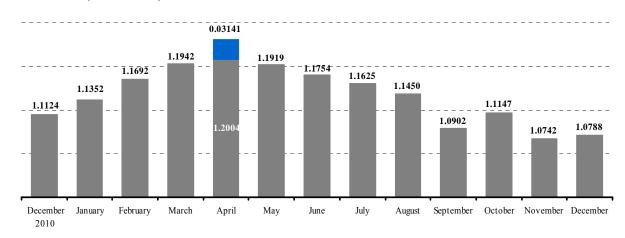

NAV Methodology

In November 2010, CNVM Regulation 4/2010 was amended by the CNVM Disposal of Measures no. 17 based on best international practice suitable for a closed-end listed fund.

In 2011 listed securities have been valued at closing market prices, while illiquid or unlisted securities are valued using either shareholders' equity value per latest financial statements, proportionally with the stake held, or according to international valuation standards which permit fair valuation.

The following chart shows information on the monthly published NAVs per share for the period 31 December 2010 to 31 December 2011:

NAV/share (RON/share)

The blue section within April 2011 NAV represents the value per share of the dividend distribution approved in April 2011, which was recorded in that month, with a corresponding reduction in NAV.

After the overall increase of Fund's NAV per share in the first half of 2011 (despite the reduction of NAV due to the dividend declared in April), the Fund's NAV decrease in the second half of the year was principally due to the fall in the prices of listed securities in the portfolio, mainly OMV Petrom (whose share price fell by 24% in the second half of the year), following the general trend of regional markets.

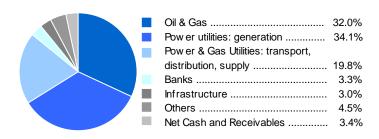

A specific reason for part of the decrease of the NAV in November was the change in valuation method used for Nuclearelectrica, from shareholders' equity per share to adjusted shareholders' equity per share. The decision to change the valuation method for this holding related to the fact that the company's shareholders' equity includes certain amounts representing Romanian state contributions

to Nuclearelectrica in the period 2006 - 2010, granted for the acquisition of heavy water, with the intent to increase the share capital of the company by those amounts, in favour of the Romanian state. The negative effect on the NAV per share was RON 0.0170.

Investment Strategy and Portfolio Analysis

The Fund's investment objective is long-term capital appreciation, primarily through investments in Romanian equities and equity-linked securities. The equity exposure amounted to 96% of the Fund's NAV as at 31 December 2011. As at that date the portfolio included holdings in 75 companies (29 listed and 46 unlisted), a combination of privately-held and state-owned enterprises. During 2011, the percentage share which the Fund held in its investments ranged from less than 1% up to 100%.

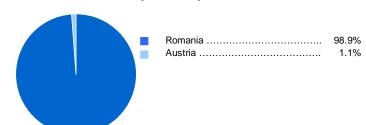

Portfolio Structure - by Sector

- The portfolio remained heavily weighted in the power, oil and gas sectors (approx. 85.8% of the NAV), through a number of listed and unlisted Romanian companies.
- Net cash and receivables includes bank deposits, current bank accounts, treasury bills, dividend receivables, as well as other current assets, net of all liabilities and provisions

Mergers

In November 2010, the General Shareholders Meetings of Electrica Furnizare Transilvania Nord SA, Electrica Furnizare Muntenia Nord SA and Electrica Furnizare Transilvania Sud SA approved the merger of the three companies and delegated the responsibility for the merger project planning to the companies' Boards of Directors. Legislation Changes

At the end of November 2011 the Government approved Emergency Ordinance 109/2011 on corporate governance principles to be applied by the state-owned enterprises. The new regulation which is in line with OECD principles of corporate governance, reinforces the separation between the State's capacity as shareholder and the responsibilities and duties of company directors and executive management. The regulation establishes transparent criteria and procedures for selecting the candidates proposed to sit on the Boards of Directors / Supervisory Boards of state-owned enterprises and confirms the Board's role in selecting and supervising the performance of Executive management. At the same time, the new regulation significantly improves minority shareholders rights in state-owned enterprises by allowing shareholders to request the application of cumulative voting for the election of the Board of Directors/ Supervisory Board and increasing the overall transparency and level of disclosure of state-owned enterprises towards shareholders and the general public.

In December 2011, Parliament approved and the President signed Law 302/2011 that sets out the obligation for state-owned enterprises from Fondul Proprietatea's portfolio to be listed by the end of 2012. The law was published in the Official Gazette on 9 January 2012. According to the Law, a total of 19 state-owned companies accounting for over 51% of Fund's portfolio should be listed by the end of 2012.

2011 financial figures are expected to be negatively affected by increased tariffs imposed for water used by power plants (estimated increase per MWh produced from 5 RON/MWh to 21 RON/MWh).

July 2011: The company signed a EUR 110 million loan with EBRD for the upgrade of the Stejaru-Bicaz power plant.

September 2011: Shareholders decided to increase the share capital of the company with RON 8,546,800 representing the value of land for which the company obtained property rights. Fondul Proprietatea received free shares worth RON 1.704.560. In December 2011 the Fund Manager decided to compensate the free shares received by the Fund from S.C. Hidroelectrica SA with part of the Fund's unpaid shares.

At the end of September 2011, due to a severe drought, the management decided to activate the force majeure clause on all its commercial contracts.

He subsequently held different positions within the company such as Head of Power Plant, Head Engineer, Head of Generation Department and since November 2010 he has been the company's Deputy CEO.

A process has been started to select a new CEO. To this purpose, an international executive search company is going to be hired.

During the first nine months of 2011, Nuclearelectrica's revenues reached RON 1.09 billion, a 3% increase from the first nine months of 2010. For the same period the gross profit increased to RON 127 million from RON 9 million recorded in the first nine months of 2010.

January 2011: GDF Suez, RWE and Iberdrola withdrew from the project to build reactors 3 and 4 at the Cernavoda nuclear facility. As a result, Nuclearelectrica increased its participation in the project to 84.7% by purchasing the shares previously owned by these three companies.

October 2011: The Government repealed its previous decision regarding the reorganization of the electricity generation sector by creating "two champions": Electra and Hidroenergetica.

November 2011: The Government published on the website of Ministry of Economy, Trade and Business Environment a draft of Emergency Ordinance regarding the future share capital increase of Nuclearelectrica with the value of heavy water bought for Reactors 3 and 4 using allocations from the State budget. According to the draft of Emergency Ordinance, since 2006 the Romanian State has transferred to Nuclearelectrica an amount of RON 1,442.5 million as State allocations for buying heavy water from Regia Autonomă pentru Activități Nucleare, a 100% state controlled company for Reactors 3 and 4. The amount received was registered by Nuclearelectrica as reserves in shareholders equity. The implementation of this Emergency Ordinance may resulted in the reduction of the value of the stake held by the Fund in Nuclearelectrica. Based on these facts in November the Fund decided to reduce the value of the stake held by the Fund in Nuclearelectrica by an amount of RON 228 million, resulting in a corresponding decrease of the Fund's NAV.

On 29 December 2011 an Emergency Ordinance published in the Official Gazette, stated that in the future the heavy water needed for reactors 3 and 4 would be purchased directly by the Romanian State and not by Nuclearelectrica. Consequently, as of January 2012, Nuclearelectrica will no longer receive budget allocations to purchase heavy water for nuclear reactors 3 and 4.

December 2011: Mr. Pompiliu Budulan, resigned from the position of CEO. Mr. Dumitru Dina, Head of Nuclear Safety Supervision Department, took over the CEO responsibilities. Mr. Dina graduated from Polytechnic University in Bucharest in 1971, majoring in nuclear power plants. After graduation, he worked for the Institute for Studies and Power Engineering (Institutul de Studii si Proiectari Energetice) (design office for energy sector) holding different positions in the Nuclear Safety Department. He also worked for RENEL (former state owned holding company that included Nuclearelectrica) and since 2006 was the Head of the Nuclear Safety Supervision Department.

A process has been started to select a new CEO. To this purpose, an international executive search company is going to be hired.

According to the latest Letter of Intent signed by the Government with IMF the company will be listed in 2012.

July 2011: OMV Petrom confirmed its decision to enter a new exploration phase of the Neptun block in the Black Sea, in partnership with Exxon Mobil Exploration and Production Ltd. November 2011: The company received a statement of objections from the Romanian Competition Council concerning an alleged breach of antitrust regulations with respect to the withdrawal of the retail product Eco Premium (unleaded gasoline pre-mixed with lead substitute) from the Romanian fuels market. Subsequently in January 2012 the company received confirmation from the Competition Council about the result of the antitrust investigation, which resulted in a fine of 366.5 million RON on OMV Petrom and 137.3 million RON on OMV Petrom Marketing S.R.L., a 100% owned subsidiary of OMV Petrom. The company is of the opinion that the fines imposed are not justified and will challenge the Competition Council's decision in the courts.

December 2011: OMV Petrom announced it contracted a medium-term multi-currency revolving credit facility amounting to EUR 930 million with a tenor of three years and a possibility of extension for two more years. This credit facility will be used for general corporate purposes including financing current investments program.

The Fund's holding increased by 170,456 free shares, at the nominal value of 10 RON/share.

Financial Risk Management

Given the nature of its business, the Fund is exposed to various risks, which include: market risk, credit risk, liquidity risk, operational risk and the risks related to the economic environment. The management monitors the reduction of the potential adverse effect associated with these risk factors on the financial performance of the Fund.

With effect from 29 September 2010, the Fund Manager implemented financial risk management procedures consistent with those applied globally by Franklin Templeton Investments.

i) Market risk

The market risk includes foreign currency risk, interest rate risk and price risk.

Foreign currency risk

The Fund can make investments in financial instruments or perform transactions denominated in foreign currency. As a result, the Fund is exposed to the risk that fluctuations in exchange rates can have an adverse effect on the value of the net assets of the Fund denominated in foreign currency.

As at 31 December 2011, the main foreign currency exposure derived from the Fund's investment in shares with a carrying value of EUR 38.5 million (RON 166.1million equivalent). Cash accounts and receivables denominated in foreign currency are not significant, only amounting to EUR 7,824 and EUR 399,879 respectively.

Interest rate risk

The majority of the financial assets of the Fund are not interest bearing. The interest bearing financial assets (deposits and treasury bills) have generally short term maturity, deposits up to 3 months and treasury bills up to 12 months. As a result, the Fund has a limited exposure to variations in interest rates.

Price risk

Price risk is the risk that the value of the securities fluctuates as a result of changes occurring on the capital market, and it is determined by factors specific to an issuer, industry, country or region or that otherwise influence the capital market overall. This is the most significant source of risk and variability in the value of the Fund.

This risk has become more material in recent years, especially from the second part of 2008, given the extremely large reductions in value of the stock exchange quotations for some of the securities in the Fund's portfolio. It has been necessary to book impairment adjustments in certain cases during recent years, and these negatively influenced shareholders' equity. During 2009, 2010 and the first part of 2011 impairment adjustments previously booked have been partially reversed due to market recoveries, but in the second part of 2011 significant impairment adjustments have been recorded for some of the listed equity investments of the Fund.

The listings of the state-owned enterprises from the Fund's portfolio planned for 2012 may have a significant impact on the valuation of these holdings in the Fund's financial statements.

ii) Credit risk

Credit risk is the risk of financial loss to the Fund if counterparties to financial instruments fail to meet their contractual obligations, and arises principally from cash and deposits with banks, treasury bills and dividends receivable.

For treasury bills held, the credit risk is assessed as low to moderate, given that their issuer is the Romanian State through the Ministry of Public Finance.

Cash held by the Fund that is not invested in portfolio companies or treasury bills may be invested in short term bank deposits. After the Fund's management was taken over by the Fund Manager, a formal policy regarding bank counterparty risks and limits was established. The Fund only establishes new deposits with financial institutions with credit ratings above investment grade. The counterparty credit risk is also diversified by allocating the cash and cash equivalents across several banks. The selection of financial institutions as deposit takers was made and the exposure limits were decided upon based on their credit ratings.

iii) Liquidity risk

Liquidity risk is the risk that the Fund will not be able to meet its financial obligations as they fall due. The Fund's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Fund's reputation.

The Fund's equity investments include unlisted securities, which are not traded in a regulated public market and generally may be considered illiquid. As a result, the Fund may not be able to liquidate quickly some of its investments in these instruments in order to meet its liquidity requirements, or to respond to specific events such as deterioration in the credit worthiness of any particular issuer.

The Fund's listed equity securities are listed on the Bucharest Stock Exchange or Vienna Stock Exchange. However, not all the shares listed on the Bucharest Stock Exchange are considered liquid due to insufficient volumes of transactions.

The Fund prudently manages liquidity risk by maintaining sufficient liquid assets to finance current liabilities.

iv) Operational risks

Operational risk is the risk of direct or indirect loss arising from a wide variety of causes associated with the Fund's processes, personnel, technology and infrastructure, and from external factors other than credit, market and liquidity risks such as those arising from legal and regulatory requirements and generally accepted standards of corporate behaviour. Operational risks arise from all of the Fund's operations.

The Fund's objective is to manage operational risk so as to balance the avoidance of financial losses and damage to the Fund's reputation with overall cost effectiveness and to avoid control procedures that restrict initiative.

v) Operating environment

The process of risk repricing during 2007 and 2008 as well as during the second part of 2011 in the international financial markets severely affected the performance of those markets, including the Romanian financial market, and fostered heightened uncertainty with regard to economic developments going forward.

The ongoing global credit and liquidity crisis has resulted in, among other things, lower level and difficult access to the capital market funding and lower liquidity levels across the Romanian banking sector.

Ongoing fears that the deterioration of financial conditions could contribute, at a later stage to a further retrenchment in confidence, prompted a coordinated effort of governments and central banks to adopt special measures aimed at countering a vicious circle of growing risk aversion and helping minimise the effects of the financial crisis and finally restoring normal market conditions. However, political and economic turmoil in the emerging markets is expected to continue, and this can impact the value of the Romanian economy, and consequently the Fund's portfolio companies and its shares.

vi) Risks arising from potential changes in the legislation governing the Fund

The existence, operation and even the initial structure of the Fund's portfolio are regulated by primary legislation, as well as by secondary legislation such as government decisions and CNVM regulations. Hence, it may not be ruled out that the current legal framework be changed so as to directly affect the Fund, and therefore its shareholders. This risk is sustained by the legislative history of the past few years that reveals a series of laws which have changed also the Fund's Portfolio compositions. Such legal changes would have to be carried out in compliance with the constitutional principles regulating the guarantee of the private property. Notwithstanding to the general principle described above, the numerous instances where the relevant institutional structures have ruled on the unconstitutionality of certain laws, prove that the risk of legislative changes which may adversely affect the Fund and which may be passed in breach of the Constitution may not be ruled out.

equivalents in NAV	8.20%	5.09%	2.93%	2.07%	3.12%

The table above shows the change in the net cash position as a percentage of the NAV.

The decrease of total liabilities over the second half of the year was mainly accounted for by the payment of the 2010 dividend and related taxes. In April the shareholders approved a distribution of a gross dividend of RON 432.7 million or RON 0.03141 per share, related to 2010 profits, payable to shareholders beginning with 30 June 2011.

The decrease of the bank deposits during 2011 as compared to December 2010 was due to the cash outflows related mainly to the acquisitions of shares, payment of dividends and related taxes and buybacks. A further reason for the decrease in the second half of the year was the acquisition of treasury bills, after part of the treasury bills previously acquired reached maturity in June. The increase in June was mainly accounted for by the collection of dividends from the portfolio companies.

Total Expense Ratio

The total expense ratio of the Fund as at 31 December 2011 was 0.38% (2010: 0.34%). This figure represents the total expenses of the Fund divided by the period end NAV. For the purpose of this calculation, expenses do not include foreign exchange losses, carrying value of equity investments disposed, impairment adjustments, interest expenses or corporate income tax. It should be noted that the expenses and fees have been chargeable on a different basis before and after 29 September 2010, due to the different administration systems in place. Some expenses such as CNVM fees and investment management and administration fees were only charged for part of 2010, and while in 2011 they were recorded for the whole year.

Income from Investments

The main objective of the Fund is long term capital appreciation primarily via investments in Romanian equities, with strict adherence to the principles of value investing. At the end of 2011, the Fund's exposure to Romanian equities accounted for 96% of the NAV, while 1% of the NAV was invested in the Austrian banks, Erste and Raiffeisen. Therefore, the performance of the Fund was affected by the fluctuations of these markets.

The BET-XT index, which reflects the performance of the top 25 most liquid stock listed on the Tier 1 of the BVB, decreased by 13.8% over the course of 2011. The broader BET-C Index fell by 15.7% in 2011. Overall, the Romanian market outperformed the largest Central European markets, especially Poland and Austria, where the main market indices fell by 30.7%, respectively 34.9%.

The income arising from the main activities of the Fund was influenced by the performance of the portfolio companies and their decision on dividend distributions, as well as by money market performance.

Capital Expenditure

The Fund did not incur any capital expenditure during 2011.

Litigations

The main types of litigations in which the Fund is involved vary depending on the subject matter and on the court position of the Fund as defendant or claimant, as follows:

(a) Fund as claimant:

- disputes against certain portfolio companies relating to the Fund's ownership right over shares issued by these companies and allocated to the Fund by law;
- disputes against the Romanian public authorities/institutions for recovery of certain securities/receivables attributed to the Fund by law;
- disputes against certain portfolio companies challenging certain corporate operations approved by these companies and requesting annulment of the shareholders' decision thereof;
- disputes against certain portfolio companies related to the payment of dividends and default interest on unpaid dividends;
- disputes against the boards of certain portfolio companies related to decisions issued by them which are in breach of fiduciary duties.

(b) Fund as defendant:

- complaints lodged by the Fund's shareholders requesting the annulment/nullity of certain shareholders' decisions of the Fund;
- complaints lodged by certain persons for the recovery of real estate assets which have been abusively confiscated during the communist regime;
- complaints lodged by certain public authorities/institutions related to the recovery of certain assets/securities from the Fund's portfolio;
- complaints lodged by certain shareholders for the payment of dividends/default interest on the unpaid dividends;

As at 31 December 2011 the Fund was involved in certain litigations, either as defendant or claimant. The Fund discloses in the financial statements those litigations which may have significant effects on the Fund's financial position or profitability. The most important litigations were the following:

- 1. The Fund is involved in several litigations regarding delayed payment penalties requested from companies which have not yet paid dividends to the Fund for the year 2005 (some of the dividends have since been paid to the Fund pursuant to the Fund winning the law suits). Such litigations are yet to be resolved. During 2011 the most common practice of the Romanian courts was to accept the Fund's claims.
 - The claims filed by the Fund are in compliance with the provisions of Law 31/1990 as republished and further amended and these amounts should be due and paid to the Fund. These amounts are only recognised as revenues when their recoverability becomes highly probable (the Court rules irrevocably in the Fund's favour).
- 2. There is currently a court litigation involving the Fund and Nuclearelectrica.
 - In this file, the Fund has sued Nuclearelectrica and the Ministry of Economy and Commerce (now the Ministry of Economy, Trade and Business Environment) and asked the court to record the transfer in the Nuclearelectrica's shareholders register of a total of 20,077,953 shares from the Ministry portfolio to the Fund portfolio in order to update the initial stake of the Fund in Nuclearelectrica, taking into account the bonus share capital increases that took place between 1 February 2006 and 13 November 2007.

The litigation was solved at the first stage by the Bucharest Court with the Court ruling against the Fund. The Fund has appealed the decision of the Court and the Bucharest Court of Appeal ruled against the Fund. The Fund will file the second appeal asking the High Court of Cassation and Justice to issue the final and irrevocable decision.

For safety reasons, given that the decision issued by the first court in this case is enforceable, the Fund has blocked a total of 340,796,918 shares issued by the Fund and owned by the Ministry of Public Finance, in amount of RON 340,796,918 being computed based on the valuation report issued in October 2007 by an independent evaluator (Finevex SRL Constanta) for the shares presumed to be owned by the Fund in Nuclearelectrica. The Fund considered that in fact the Ministry of Public Finance has not contributed to the share capital of the Fund with this amount. After the courts will issue an irrevocable decision regarding this case the Fund will propose to its shareholders measures in order to solve the issue of unpaid share capital, if it is the case.

As at 31 December 2011 the Fund owned 24,676,222 shares representing 9.72% of the share capital of the Nuclearelectrica, as recorded at the Trade Register Office.

- 3. On the role of the courts there are many litigations started by the Fund against the merger plans for creating Hidroenergetica and Electra; in many of these cases the courts have decided to suspend the merger and in two of them the courts ruled in favour of the Fund and decided to block the merger plan. The merger process and the creation of Electra and Hidroenergetica were blocked and the Romanian Government decided to renounce this project. In October 2011, the Romanian Government repealed its previous decision regarding the reorganization of the electricity generation sector for creating Electra and Hidroenergetica and the Government approved as an alternative plan for the restructuring of the electricity generation sector, the creation of Complexul Energetic Oltenia by merging Complexul Energetic Turceni, Complexul Energetic Rovinari and Complexul Energetic Craiova with Societatea Nationala a Lignitului Oltenia.
- 4. Some minority shareholders of the Fund have filed claims against the Fund with the Court requesting the cancellation of certain resolutions of certain general shareholders meetings. In one of these cases the Bucharest Court announced that it found in favour of the claimant for the annulment of certain shareholders decisions from the General Meeting of 6 September 2010, relating to approving the Constitutive Act, revoking the mandates of the Supervisory Board and the Board of Directors, appointing Franklin Templeton Investment Management Limited United Kingdom, Bucharest Branch as the Sole Administrator of the Fund and appointing the members of the Board of Nominees. The full decision has not yet been issued by the court and can be appealed. We noted that, on 29 November 2010 and 23 November 2011 the shareholders of Fondul Proprietatea approved once again the Constitutive Act of Fondul Proprietatea and for the avoidance of doubt, all the decisions approved at those General Shareholders Meetings remain in full force and effect.

Other contingencies of the Fund included:

- 1. The Fund shall receive the following amounts from the Romanian State:
 - a the amount resulting from the trading on the Romanian or foreign stock exchange markets of the first 3% of Romtelecom SA shares;
 - b 20% of the amounts resulting from the privatization of Romtelecom SA;
 - c 9.9% of the amounts resulting from the privatisation of C.E.C. SA;

These amounts should be recorded as payments for the unpaid capital or as increases of the share capital by the Romanian State once they are collected, with the approval of shareholders, according to the legislation in force.

2 The receivables from World Trade Center Bucharest SA:

Section II, Article 4 of GEO. 81/2007 stipulates the transfer from AVAS to the Fund of receivables from World Trade Center Bucharest SA amounting to USD 68,814,198 (including the original principal and related interest and penalties) on 29 June 2007.

On 1 October 2007 a reception minute was concluded between AVAS and the Fund based on which all documents related to the receivables due from World Trade Center Bucharest SA were transferred to the Fund.

On 4 October 2007, the Fund notified World Trade Center Bucharest SA regarding the cession of the receivables. Meanwhile, the transfer was registered with the Electronic Archive for Pledges.

Currently, World Trade Center Bucharest SA is the object of insolvency procedure, the next hearing being set for 28 March 2012.

In 2008, World Trade Center Bucharest SA paid USD 200,000 to the Fund, in 2009 USD 200,000 and in 2010 USD 110,130.69, EUR 148,700.76, RON 8,724,887.92. No such payments have been made to the Fund during 2011. In accordance with GEO 81/2007, these cash receipts reduced the balance of the receivables in respect of equity contributions.

Given the uncertainties regarding their recoverability, the World Trade Center Bucharest SA receivables were recognised on receipts basis in the Fund's financial statements.

Trading of the Fund's Shares

As of 31 December 2010 shares issued by the Fund were not traded on any stock exchange. Since no public offering of the Fund's shares was made, the admission to trading on the regulated market of BVB was intended to be purely administrative in nature.

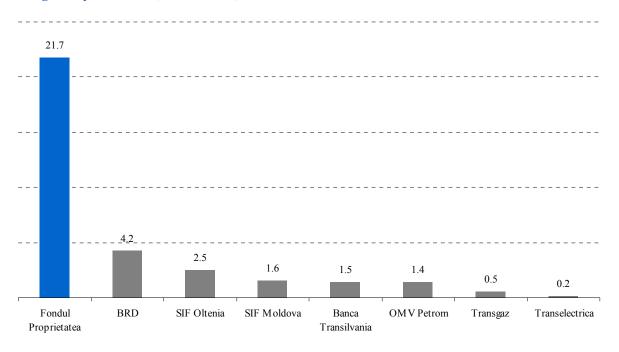

The Fund applied for admission to trading in December 2010 in the Tier I category of the BVB. The Fund's listing prospectus was approved by the CNVM on 16 December 2010 and by the BVB on 6 January 2011.

The prospectus included all material information about the Fund as required by the European Union and CNVM regulations, including profiles of all the companies in the Fund's portfolio. Dividends

The Fund's dividend policy was defined in the December 2010 Prospectus for Listing as follows: "In the absence of exceptional market conditions or circumstances, the Fund Manager intends to recommend to shareholders the distribution of 100% of distributable revenue profits each year, broadly defined as gross dividend income received from investments and interest earned on cash deposits, less expenses and taxation, subject to legal and taxation regulations". Current legislation requires the Fund to transfer 5% of its profits to legal reserves until that reserve reaches a value equivalent to 20% of the value of the issued share capital of the Fund.

The amount of total gross dividend, gross dividend per share for 2006 - 2010, total number of shares, as well as the status of dividend payments as at 31 December 2011, is included in the table set out below:

^{*} The total number of shares based on which the dividends have been distributed is the number of Fund's shares in issue at the registration date decided upon by the OGSM approving the dividend distribution, less any unpaid shares and/or buybacks (where applicable).

2011 Dividend proposal

The Fund Manager intends to recommend to shareholders a gross dividend of RON 0.03854 per share arising from 2011 profits, based on the dividend policy stated in the Fund's listing prospectus. Subject to shareholders' approval, the distribution of dividends is expected to start in June 2012.

Share Buy-Back Programme

At the September 2010 General Shareholders' Meeting, the Fund's shareholders authorised the Fund Manager to repurchase up to 10% of the outstanding shares before 1 March 2012, at a price per share within the RON 0.2 to RON 1.5 range. The Fund only had RON 120.3 million in available reserves to use for the share buy-backs (this figure derives from the 31 December 2010 financial statements in accordance with Romanian Accounting Regulations).

In an effort to enhance the intrinsic value per share of the Fund, the Fund Manager initiated the buy-back programme in the first half of 2011 and it had completed it by the end of the third quarter. During the programme, 240.3 million shares, equivalent to 1.74% of the Fund's share capital were repurchased, at an average price of RON 0.4994, for a total amount of RON 120.3 million.

At the General Shareholders Meetings on 23/25 November 2011, the Fund Manager proposed to cancel the treasury shares, but the proposal was not voted due to the lack of a quorum (attendance of at least 50% of the paid share capital is required for such a decision). The proposal to cancel these shares will be carried forward to the 2012 shareholder meetings.

Subsidiaries Owning Fund's Shares

None of the subsidiaries of the Fund hold shares in the Fund, according to the information made available to the Fund.

Issued Debt

The Fund had no bonds or other debt securities in issue during 2011.

Corporate Governance of the Fund

The Fund has a clear and transparent corporate governance framework that was concluded in 2011. The framework sets out clearly, for public reference, the main aspects of the Fund's corporate governance structure, the respective functions of the Board of Nominees and the Fund's Sole Administrator, as well as their powers and responsibilities and is published on the webpage of the Fund. The Fund develops and updates its corporate governance framework, so that it can meet new demands and opportunities.

The Fund has a transparent decision-making process, relying on clear rules, in order to enhance shareholders' confidence. It also contributes to the protection of shareholders' rights, improving the overall performance of the Fund, offering better access to capital and risk mitigation.

The Fund gives a great importance to the principles of good corporate governance and, coinciding with its listing at the start of 2011, has adhered to the Bucharest Stock Exchange Code of Corporate Governance.

In September 2010, a one-tier system of governance was implemented in the Fund, as a result of the implementation of the rules established by Government Ordinance 81/2007. Although the Fund is currently administrated by a one-tier system, the role of the Board of Nominees tends to be very similar with the role of a Supervisory Board, with a few distinctions.

Since adopting the one-tier system, the Fund's governance is administrated by the Sole Administrator, which is also the Fund Manager. The Sole Administrator manages the daily operations of the Fund and, as Fund Manager, implements the investment strategy on behalf of the Fund. The Board of Nominees, elected by the shareholders, acts as a monitoring body and follows the activity of the Sole Administrator and Fund Manager, verifying the unrolling of the Investment Management Agreement.

The powers and duties of the above-mentioned bodies are described in: the Constitutive Act of the Fund that is attached to this report as Annex 5 and is available on our website; the Investment Management Agreement, signed between the Fund and Franklin Templeton Investment Management Limited United Kingdom; the Investment Policy Statement, approved by shareholders in September 2009; and other internal regulations.

Commitment to Follow the Principle of Corporate Governance

In accordance with best corporate governance practice, the Fund is managed in a climate of transparency, based on honest discussions between the Sole Administrator and the Board of Nominees.

Both Sole Administrator and its employees and the members of the Board of Nominees have a duty of care and loyalty towards the Fund. Hence, the Sole Administrator and the Board of Nominees pass their resolutions as required for the welfare of the Fund, primarily in consideration of the interests of shareholders and investors.

General Shareholders Meeting

The General Shareholders Meeting ("GSM") shall be convened by the Sole Administrator, with the prior approval of the Board of Nominees, whenever necessary, in accordance with the provisions of the law. The date of the Meeting may not be less than 30 (thirty) days after publishing the convening notice in the Official Gazette of Romania part IV. The convening notice shall be published in the Official Gazette of Romania, part IV, and in one of the widely-distributed newspapers in Romania. In exceptional cases, when the Fund's interest requires it, the Board of Nominees may convene the General Shareholders Meeting. The convening notice will be disseminated to the Bucharest Stock Exchange and the National Securities Commission in accordance with the capital markets regulations. The convening notice will also be made available on the Fund's website under the respective General Shareholders Meeting section, together with any explanatory document related to items included on the General Shareholders Meeting agenda.

The annual financial statements are made available starting with the date of the convening notice of the Annual Ordinary General Shareholders Meeting convened to resolve upon them.

The Board of Nominees has a sufficient number of members in order to have effective capacity to supervise, scrutinise and evaluate the activity of the Sole Administrator and the fair treatment of all the shareholders.

The composition of the Board of Nominees is balanced so as to enable it to take well-informed decisions. The decision-making process is a collective responsibility of the board, which remains fully answerable for decisions taken within its field of competence.

One member of the Board of Nominees (Sorin-Mihai Mîndruţescu) is independent, in the sense that he does not maintain, nor has recently maintained, directly or indirectly, any business relationships with the Fund or persons linked to the Fund, or shareholders of the Fund, of such significance as to potentially influence them.

The Board of Nominees ensures that consultative committees (Remuneration and Nominalization Committee and Audit Committee) are constituted to examine specific topics chosen by the Board and to report to the Board on the same. One independent Board of Nominees member sits on each such committee (Sorin-Mihai Mîndruţescu). The mandate of each member of the Board of Nominees imposes the same kind of restrictions around confidentiality of the Fund's information and the same kind of reporting and consent requirements on the individual's ability to personally trade in the Fund's shares as are in place for the Sole Administrator's staff.

The members of the Board of Nominees may be shareholders of the Fund.

 - 1 (one) share carried 1 (one) voting right for the part of the holding representing less than but including 1% of the Fund's paid up share capital, and
 - 2 (two) shares carried 1(one) voting right for the part of the holding representing between 1% and 3% of the Fund's paid up share capital;
 - 3 (three) shares carried 1 (one) voting right for the part of the holding representing between 3% and 5% of the Fund's paid up share capital, and
 - no voting rights shall be attached to the part of the holding exceeding 5%.

The above mentioned restrictions on the exercise of the voting rights attached to the shares did not apply to the holdings of the Ministry of Public Finance. However, the voting rights restriction was mandatory to be kept in the Constitutive Act as long the Romanian state's participation in the Fund's share capital exceeded 33% of the paid share capital. Beginning with May 2011, the Romanian state participation decreased under 33% and the Sole Administrator started the procedure for modifying the Constitutive Act.

On 23 November 2011 the Extraordinary General Shareholders Meeting approved the cancelation of the voting restrictions modifying the Constitutive Act of the Fund. The change of the Constitutive Act was effective beginning with 13 January 2012.

At present, the Constitutive Act does not specify any further special conditions on such rights than those specified by the law.

The Romanian legislation imposes another restriction regarding unpaid shares and as a result, as long as the Romanian state has unpaid shares, it has no voting rights for those unpaid shares and has no right to receive dividends in relation to them.

With respect to the right to receive dividends, the Constitutive Act set out that the Fund's net profit shall be distributed based on the decision of the general shareholders meeting, each shareholder being entitled to receive dividends proportionally to the number of paid shares held by it in the Fund's share capital. Pursuant to the Companies' Law, the payment of dividends shall be carried out no later than 6 months from the approval of the annual financial statements for the previous year, under penalty of default interest payment.

Other than as presented above, no rights, preference or restrictions are attached to the shares. Pursuant to the Companies' Law, as a rule, the shares issued by a company entitle each holder to equal rights. Such rights mainly refer to the shareholders' involvement in the operations of a company and the resulting benefits and are regulated by the applicable laws. Shareholders must exercise their rights in good faith, without breaching the interest of other shareholders or that of the company.

The Fund is committed to encouraging shareholders to participate in shareholders general meetings, as well as the full exercise of their rights and to raise questions concerning items to be debated during such meetings. General shareholders meetings enable and encourage dialogue between the shareholders and the Fund and its representatives. The Fund encourages its shareholders to take part in meetings, and those who cannot attend are able to vote in absentia by sending the votes to the headquarter of the Fund, using the voting bulletin for the votes by correspondence made available by the Fund at the headquarters and/or on the Fund's website.

Furthermore, the Fund ensures that its shareholders have access to relevant material information, so as to allow them to fully exercise their rights. The Fund has a dedicated section on its website (www.fondulproprietatea.ro) that can be easily identified and accessed. This information typically includes: the time and place of meetings; information on how to exercise voting rights including the proxy process with relevant forms; meeting agendas as well as detailed documents relating to specific agenda items.

The Fund Manager has established a dedicated investor relations team. This experienced team is responsible for handling relationships with both private and institutional investors locally and abroad.

In conclusion, in present the Fund observes the one paid share, one vote, and one dividend principle. There are no shares conferring the right to more than one vote or preference shares.

Shareholders holding at least 5% of the paid share capital may ask for calling of a General Shareholders Meeting. Such shareholders have also the right to add new items on the agenda of a General Shareholders Meeting, provided such proposals are accompanied by a justification or a draft resolution proposed for approval and copies of the identification documents of the shareholders who make the proposals.

Proposals with respect to adding new items on the agenda of such General Shareholders Meeting can be submitted at the headquarters of the Fund, or by e-mail having attached an extended electronic signature, in compliance with the Law no. 455/2001 on digital signature.

Likewise, the shareholders holding at least 5% of the paid share capital are entitled to propose, revised versions of resolutions for the items listed on the agenda or proposed by other shareholders to be added on the agenda of such General Shareholders Meeting.

The shareholders may attend in person or may be represented in the General Shareholders Meetings either by their legal representatives or by representatives having a special proxy, based on the special proxy template made available by the Fund. Such proxy template may be obtained from the Fund's headquarters and/or can be found on the Fund's website, under the respective General Shareholders Meeting section item.

The shareholders of the Fund, regardless of the stake of the share capital held, may submit written questions with respect to the items on the agenda of the General Meetings of Shareholders. The shareholders may also send such questions by e-mail. The answers will be provided during the General Shareholders Meeting based on public information or non-public and non-material information. Should the questions require elaborate answers, a Q&A (questions and answers) form will be made available on the Fund's website. The disclosure of commercially sensitive information that could result in a loss or competitive disadvantage for the Fund will be avoided when providing the answers, in order to protect the interest of our shareholders.

Women's Advancement

The Fund and the Sole Administrator supports gender diversity and promotion of women in management positions.

While there are currently no female members of the Board of Nominees, the Sole Administrator has women in its management.

Likewise, more than 50% of the first line directors of the Sole Administrator are women. The proportion of women in the structure of the Sole Administrator as a whole is about 63%.

Bucharest Stock Exchange Code of Corporate Governance

The Fund adheres to the Bucharest Stock Exchange Code of Corporate Governance. The details about the compliance with the principles and recommendations stipulated under the Bucharest Stock Exchange Code of Corporate Governance are presented in the "Comply or Explain" Statement, which is the Annex 8 to the 2011 Annual Report.

Internal Control and Risk Management

The Sole Administrator has issued internal regulations to ensure that timely and accurate disclosure is made on all material matters regarding the Fund, including the financial position, performance, ownership and governance of the Fund. In addition, strict internal rules, designed to protect the Fund's interests, have been established in the areas of financial reporting, internal control and risk management.

According to article 62 of the Law 297/2004 regarding capital market, with subsequent amendments, the Sole Administrator has established a compliance department specialized in the control of compliance by the firm and by its staff with the legislation in force regarding the capital market as well as with internal regulations. The registered Compliance Officer is part of the Franklin Templeton International Compliance Department and reports directly to the Compliance Manager – Advisory EMEA.

The compliance department is responsible for providing regulatory guidance, advice and compliance training to operational departments, assisting them in managing the reputational risk in relation to legal or regulatory requirements and codes of conduct and performing 2nd level compliance controls. It covers the areas of conduct of business rules, personal conduct and anti-money laundering/financial crime.

The Sole Administrator has implemented a Risk Management Policy. The purpose of this policy is to establish an effective risk framework which meets regulatory requirements, and thereby enhances the Administrator's governance structure throughout the business.

The European Risk Committee is responsible for the oversight of all risk management processes, including those relating to Anti Money Laundering (AML), and is made up of senior management from the business areas and key risk and control functions. Meeting quarterly, it reviews risk reports and input from business management and maintains a detailed register of risk items and resolutions.

The FTIML Board of Directors provides oversight by being aware of risk management practices and their deployment within the firm, staying apprised of significant risks and management responses. The Board of Directors of FTIML has assigned this responsibility to the Audit Committee of FTIML.

In addition, the Sole Administrator oversees the risk based on its Compliance Monitoring Policy. The risk assessment is a critical element of Compliance's oversight and monitoring program. The compliance monitoring programme is updated annually with findings reported to Senior Management on a monthly basis. At a minimum, high risk areas are monitored annually; medium risk areas are monitored on an 18 month cycle and low risk items on a 3 year cycle. The compliance monitoring programs will be updated to reflect the results of the final risk assessment for each fiscal year.

In respect of the portfolio monitoring activity, the Sole Administrator has procedures and controls which are designed to ensure that all assets are managed prudently and in accordance with client mandates. In addition the Administrator has a dedicated team of specialists who are responsible for the rigorous day-to-day monitoring of all client accounts against the agreed investment guidelines and constraints.

The front office trade management system has embedded compliance functionality which enables investment restrictions, regulatory and internal requirements to be included within the system. All trade orders (with the exception of foreign exchange trades and certain debt and derivative security trades) are automatically checked against the relevant investment restrictions in our system prior to trading. Exceptions are investigated and cleared by Global Investment Advisor Compliance ("GIAC") before the trade can proceed.

Post trade compliance checks are automatically run overnight for all portfolios against the investment restrictions included within our trade management system. Any exceptions are investigated and cleared by GIAC. Investment restrictions that cannot be automated are reviewed periodically. All active and passive breaches are reported to the relevant investment managers and operating departments. Corrective action is taken as necessary to address and resolve any issues. Trading errors are monitored by the Global Compliance department.

The Global Compliance department produces monthly reports which provide details on significant compliance matters and initiatives, updates on monitoring activities, and current complaints and breaches. These reports are circulated to the relevant senior management.

Conflicts of Interests and Related Parties Transactions

The Sole Administrator/Fund Manager adopted operating solutions suitable to facilitate the identification and adequate handling of any situations in which a member of the Board of Nominees or the Sole Administrator/Fund Manager has an actual or potential conflict of interest between the interest of the Fund and his/her own or on behalf of third parties. The Fund Manager will adopt operating solutions suitable for the adequate handling of any situations arising from related parties transactions.

Treatment of Corporate Information

The members of the Board of Nominees and the Sole Administrator/Fund Manager shall keep confidential any documents and information acquired in the performance of their duties.

Financial Statements Analysis

The audited financial statements for the year ended 31 December 2011 prepared in compliance with Romanian Accounting Regulations are included in full in Annex 1 to this Report.

This section provides a commentary on the principal elements of the Fund's financial position and results for the period of three years ended 31 December 2011.

Balance Sheet

	31 December 2009	31 December 2010	31 December 2011
	Audited	Audited	Audited
	RON million	RON million	RON million
Tangible and intangible assets	0.5	-	-
Financial assets	9,552.1	10,890.5	10,627.9
Non-current assets - total	9,552.6	10,890.5	10,627.9
Current assets - total	2,666.8	1,332.4	549.2

Payables within one year	7.4	69.3	42.2
Total assets less current liabilities	12,212.1	12,153.6	11,134.9
Provisions	15.1	14.4	14.2
Shareholders' equity	12,197.0	12,139.2	11,120.7

The value of **tangible and intangible assets** was nil by the end of 2010 and 2011 as the Fund disposed of most of these assets (either by sale or write off) due to its administration being taken over by the Fund Manager in 2010. The new administrator is responsible for providing its own premises and equipment, and the residual assets of the Fund were no longer required following relocation to new premises.

Financial assets include the Fund's listed and unlisted equity investments. According to Romanian Accounting Regulations, both listed and unlisted equity investments are valued at cost (or their initial value) less any adjustments for impairment. For listed investments, the impairment adjustment is any adverse difference between cost and closing price (an impairment adjustment is booked if closing price is lower than cost). For unlisted or illiquid listed equity investments, the impairment test compares the cost to the Fund's share of shareholders' equity as per the portfolio companies' latest available financial statements, and any adverse result is booked as an impairment.

The value of the financial assets increased by RON 1,338.4 million in 2010 compared to 2009 mainly generated by the reversal of impairment adjustments for equity investments recorded in previous years, principally for OMV Petrom and Hidroelectrica.

As at 31 December 2011, the value of financial assets decreased by RON 262.6 million as compared to the end of previous year. The decrease was mainly due to impairment adjustments recorded during the year for listed equity investments (principally for OMV Petrom) and for Nuclearelectrica holding (adjusted to take account of Nuclearelectrica's shareholders' equity contributions from the Romanian State in previous years, granted for the acquisition of heavy water, with the intent to increase the share capital of the company by those amounts, in favour of Romanian State). The decreased of financial assets was partially offset by the acquisitions of listed equity investments in Romania and Austria.

The significant fall in the value of **current assets** since 2010 was mainly accounted for by the gross RON 1,124.3 million dividend payments to shareholders which commenced in October 2010. The amount of current assets at the year end 31 December 2009 was higher compared with 2010 and 2011, especially due to the receipt of proceeds on disposal of financial assets and also because no dividends were paid out during that year.

As at 31 December 2011, the drop in current assets of RON 783.2 million, compared with 31 December 2010, was mainly related to the decrease of cash balances due to the acquisition of listed equity investments, the funding of buy-backs, and the payment of the 2010 dividend and related taxes. Current assets were positively influenced however by dividends distributed by portfolio companies during 2011.

The significant increase in **payables** as at 31 December 2010 as compared to 2009, was generated by the dividend payable to Fund's shareholders uncollected until year end, and also by the new liabilities arising in the Fund for the first time in 2010, following its registration with CNVM in August and the commencement of the Fund Manager's contract in September. In 2010, this caption also included tax liabilities, and RON 9.7 million of liabilities relating to contributions received from the significant shareholder of the Fund, the Ministry of Public Finance, which have not yet been converted into share capital as at that date.

Payables decreased during 2011 mainly accounted for by the payment of the 2010 dividend and related taxes.

^{*} Other expenses from current activity include bank charges, material and utilities expenses, salary costs, third party expenses as well as duties and other taxes

Revenues from financial assets represent dividend income earned from the Fund's portfolio companies. The income significantly increased in 2011 compared to 2010 (by RON 340.1 million), due to the higher level of dividend distributions from portfolio companies, mainly: OMV Petrom RON 201.6 million; Romgaz RON 106 million; Hidroelectrica RON 52.5 million; and Transgaz RON 50.8 million.

Interest income arises from deposits held with banks and from treasury bills. The significantly lower level of income during the year 2011 compared to the years 2010 and 2009 is a reflection of the lower level of interest yielding assets held during 2011, due to the payment of dividends (for 2008 and 2009, starting in October 2010 and for 2010, starting in June 2011), and the acquisition of equity investments.

The large **reversal of impairment adjustments & provisions** in 2010 is mostly accounted for by the 2010 reversal of an impairment adjustment for RON 216.6 million in respect of equity investment in Hidroelectrica, which was originally booked in 2006 and 2007 through Income Statement.

In 2011 the reversal of impairment adjustments & provisions was mostly accounted for by the reversal of impairment adjustments for the 2005 dividend receivables from Transgaz, of RON 9.6 million and Romgaz, of RON 18.7 million. The litigations against Transgaz and Romgaz for the recovery of these dividends and the related penalties for late payment were irrevocably ruled in the Fund's favour in 2011.

Revenues from disposal of financial assets (RON 980.2 million in 2009 and RON 13.4 million in 2011) represent the proceeds from the sales of portfolio company holdings, while the expenses from disposal of financial assets (RON 428.7 million in 2009 and RON 4.6 million in 2011) represent the cost or carrying value of these investments prior to disposal. The pre-tax net gain in 2009 was RON 551.5 million and in 2011 was RON 8.8 million, while there were no such sales in 2010.

Other income from current activity increased significantly in 2011, including principally penalties levied by the Fund for late payment of dividends and litigation expenses recovered. These mainly related to the 2005 Transgaz dividend receivable of RON 4.2 million and to the 2005 Romgaz dividend receivable of RON 5.8 million.

From 2010, **commissions and fees** mainly included CNVM's 0.1% per annum fee, calculated on the basis of Fund's NAV, amounting to RON 15.6 million in 2011 (2010: RON 5.4 million), and the depositary banks' fees of RON 1.6 million (2010: 0.6 million).

In 2011, the expenses for **depreciation, provisions, losses from receivables and sundry debtors** were related to S.C. Electromecanica Ploiesti SA, because the Ministry of Public Finance did not transfer to the Fund the holding in this company. This expense category included the impairment loss adjustment in respect of the receivable related to the equity contribution of the Ministry of Public Finance. This receivable is the difference between the amount due from the Ministry following the cancellation of the contribution corresponding to the holding in Electromecanica Ploiesti (after the decision of the High Court of Cassation and Justice, which irrevocably rejected in May 2011 the request of the Fund to be registered as a shareholder of this company), amounting to RON 21.4 million, and the cash and equity received from Ministry of Public Finance, not converted into share capital, amounting to RON 9.7 million. The Fund recorded an impairment loss adjustment for the whole amount due by the Ministry of Public Finance in respect of equity contribution. In the fourth quarter of 2011, the Fund received a further contribution towards the above mentioned receivable via the nominal value of the 170,456 shares in Hidroelectrica SA received by the Fund free of charge, according to GEO 81/2007, which amounted to RON 1.7 million. The RON 1.7 million reversal of the impairment adjustment has been recorded in **reversal of impairment adjustments & provisions**.

Other expenses from current activity can be analysed as follows:

	2009	2010	2011
	Audited RON million	Audited RON million	Audited RON million
FTIML investment management and administration fees	_	18.3	32.1
Salaries and similar expenses	13.5	4.1	0.8
Stamp duties for litigations	0.8	5.3	0.1
Success fee due to Fund's advisor & related VAT	-	9.1	-
VAT for intra-EU services from previous years and related penalties for late payment		1.7	
Other expenses	9.2	7.6	4.9
Other expenses from current activity	23.5	46.1	37.9

During the year 2011, these expenses decreased overall by RON 8.2 million compared to the previous year. This is mainly related to the recording in July 2010 of the success fee payable to the Fund's advisor for the selection of the fund manager (amounting to RON 7.4 million) and related irrecoverable VAT (amounting to RON 1.8 million) and to higher stamp duties for litigations and salaries and similar expenses recorded in 2010. However, FTIML's investment management and administration fees were higher in 2011 as compared to previous year, as their appointment only commenced in September 2010.

The change in the nature of the other expenses in this category is largely attributable to the different administration structures in place before and after September 2010. Prior to this date, the Fund was self-administered and had its own employees and infrastructure (explaining the significant higher level of salaries and similar expense and of other expenses in 2009, compared to the following years). Following the appointment of FTIML as sole administrator, the Fund no longer incurred these types of expenses, and instead incurred an administration fee.

The Fund Manager's investment management and administration agreement became effective on 29 September 2010. Until the listing of the Fund on 25 January 2011, the management fee of 0.379% and the administration fee of 0.1% per annum were based on the Fund's NAV, while afterwards the basis changed to the market capitalization of the Fund.

The higher charge in 2010 for stamp duties was related to actual litigation activity, principally the litigation with the Romanian State concerning the privatisation of BCR.

Other expenses included mainly audit and advisory fees (tax, legal, other) and, in 2011, investor relations expenses.

Income tax expense during the year ended at 31 December 2011 was significantly lower than during the years 2010 and 2009. It is important to note that the revenues from financial assets (dividend income) are recorded net of any tax withheld at source (if applicable). Consequently these revenues are considered non-taxable in the computation of income tax expense.

The **payments of other taxes and commissions** recorded in 2010 and 2011 mainly refer to the commission fees paid to CNVM (of RON 15.6 million in 2011 and RON 3.6 million in 2010) following the Fund's registration in August 2010. In 2010, these also included the stamp duties paid in relation with the litigation concerning the privatisation of BCR (RON 5.1 million).

Dividends received were significantly higher in 2011 as compared to the previous years, mainly because the portfolio companies distributed relatively higher dividends in 2011 and the Fund collected the main part of these dividends during the year.

The **acquisitions of financial assets** in 2010 and 2011 were related entirely to the purchases of listed equity investments in Romania and Austria.

The **proceeds from the sales of financial assets** in 2009 were generated mainly by the disposal of the 30% holdings in CEZ Distributie, in amount of RON 965.3 million. In 2011, the main part of the proceeds was related to the disposal of the holdings in Laromet SA (RON 6.3 million), Zamur SA (RON 3.2 million) and part of the holdings in Oil Terminal SA (RON 3.3 million).

Dividends paid in 2011 principally included the 2010 dividend whose distribution started on 30 June. 99% of the total distribution of RON 432.7 million was paid until 31 December 2011. Fund declared in April 2011 and began to distribute starting 30 June a gross dividend of RON 432.7 million or RON 0.03141 per share. This dividend represented the distributable 2010 profits.

In 2010 the Fund declared and began to distribute from October a gross dividend of RON 1,124.3 million or RON 0.0816 per share. This dividend represented the distributable profits of both 2008 and 2009. Shareholders also continued to collect dividends declared in 2007 and 2008 during 2010. By the end of 2010, shareholders had collected over 98% of total dividends distributed by the Fund. No dividends were declared in 2009.

INDEPENDENT AUDITOR'S REPORT

Report on the separate financial statements

1 We have audited the accompanying separate financial statements of S.C. Fondul Proprietatea S.A. ("the Fund"), which comprise the balance sheet as at 31 December 2011, and the income statement, statement of changes in equity and cash flow statement for the year then ended, and a summary of significant accounting policies and other explanatory notes, presenting the following:

Total Shareholder's equity:

RON 11,120,701 thousand

Profit/loss for the year:

RON 543,825 thousand, profit

Management's responsibility for the separate financial statements

Management of the Fund is responsible for the preparation and fair presentation of these separate financial statements in accordance with the Accounting Law no. 82/1991, as revised, and with the Order of the President of the National Securities Commission ("CNVM") no.13/2011 for the approval of Regulation no. 4/2011 regarding accounting regulations compliant with Economic European Commission Directive IV ("EEC Directive IV"), applicable to the entities authorized, regulated and monitored by the CNVM, with the subsequent amendments and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' responsibility

Our responsibility is to express an opinion on these separate financial statements based on our audit. We conducted our audit in accordance with the Auditing Standards issued by the Romanian Chamber of Financial Auditors and the International Auditing Standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the separate financial statements are free from material misstatement.

- 4 An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the separate financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the separate financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Fund's preparation and fair presentation of the separate financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the separate financial statements.
- 5 We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

6 In our opinion, the accompanying separate financial statements present fairly, in all material respects, the financial position of S.C. Fondul Proprietatea S.A. as of December 31, 2011, and its financial performance and its cash flows for the year then ended, in accordance with the requirements of the Romanian Accounting Standards, which comprise Accounting Law no. 82/1991, as revised, and Order of the CNVM President no. 13/2011 for the approval of the Regulation no. 4/2011, with the subsequent amendments and as described in the accounting policies presented in the notes to the separate financial statements.

Emphasis of matter

- Without qualifying our opinion, we draw attention to Note 6 (a) to the separate financial statements which states that consolidated financial statements of the Fund prepared in accordance with International Financial Reporting Standards, as adopted by EU have not yet been published. Note 6 (a) to the separate financial statements explain when consolidated financial statements will be published and the method of accounting and other disclosures related to unconsolidated subsidiaries respectively.
- Without qualifying our opinion, we draw attention to the fact that during 2011 a number of major economies around the world have experienced strong volatility in the capital markets and severe restrictions in the credit markets. As a consequence of the recent market turmoil in capital and credit markets both globally and in Romania, notwithstanding any potential economic stabilization measures that may be put into place by the State, economic uncertainties arose surrounding the continual availability and cost of credit for the Fund's counterparties, future development of the markets and demand for goods and services they produce. The potential for economic uncertainties to continue in the foreseeable future and as a consequence, the potential that assets of the Fund may be not recovered at their carrying amount in the ordinary course of business, and a corresponding impact on the Fund's profitability cannot be estimated reliably as of the date of this report. As of December 31, 2011 the Fund has determined the impairment of financial assets for the unquoted companies based on participations held in the equity of these companies, shown in the latest available financial statements, which in most cases date back to 30 June 2011, the value of this impairment may differ had the financial statements as at 31 December 2011 been readily available.

Other Matters

- 9 This report is made solely to the Fund's shareholders, as a body. Our audit work has been undertaken so that we might state to the Fund's shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Fund and the Fund's shareholders as a body, for our audit work, for this report, or for the opinion we have formed.
- 10 The accompanying separate financial statements are not intended to present the financial position, results of operations and a complete set of notes to the separate financial statements of the Fund in accordance with accounting principles and practices generally accepted in countries and jurisdictions other than Romania. Accordingly, the accompanying separate financial statements are not designed for those who are not informed about Romanian legal and statutory requirements.

Report on conformity of the Administrators' Report with the Separate Financial Statements

In accordance with the Order of the CNVM President no. 13/2011 for the approval of the Regulation no. 4/2011, with the subsequent amendments, Section 7, article 278, point 4, we have read the Administrators' Report. The said report is not part of the separate financial statements. In the Administrators' Report we have not identified any historic financial information which is not in accordance, in all material respects, with the information presented in the accompanying separate financial statements.

The CNVM Order 13/2011 regarding the approval of the "Accounting Regulations compliant with EEC Directive IV applicable to the entities authorised, regulated and monitored by the National Securities Commission" provides for the preparation of the financial statements at historical cost.

The Fund is required to prepare consolidated financial statements in compliance with International Financial Reporting Standards as endorsed by European Union ("IFRS"). Fondul Proprietatea Group, comprising Fondul Proprietatea S.A. and its subsidiaries will prepare a set of consolidated financial statements, in accordance with IFRS, for the year ended 31 December 2011, and these will be published in accordance with the requirements of the legislation in force.

b. Basis of preparation of the financial statements

These financial statements are prepared and expressed in RON and are rounded to the nearest unit. The financial statements have been prepared on the basis of the accounting records held by the Fund, in accordance with the Romanian accounting regulations applicable to the institutions regulated and monitored by CNVM.

These financial statements have not been prepared to reflect the financial position and the results of operations in accordance with IFRS.

The financial statements were prepared in compliance with the accrual basis of accounting. Thus, the effects of the transactions and of other events are recognised when they occur and are recorded in the accounts and reported in the financial statements of the related periods.

The general accounting principals applied are as follows:

- **Going concern principle** assumes that the Fund will continue to operate normally in a predictable future without facing the impossibility of continuing as a going concern or without a significant reduction in its activity;
- Consistency principle involves the application of the same rules regarding the evaluation and recording in the account of the transactions, ensuring the comparability in time of the financial information;
- **Prudence principle** assumes all the impairment adjustments for assets, as well as all the liabilities and potential losses incurred current or previous financial years are recorded;

b. Basis of preparation of the financial statements (continued)

- **Accrual principle** assumes that all the income and expenses pertaining to the financial year are recorded, irrespective of the date of receipt or payment of these income and expenses;
- **Separate valuation of assets and liabilities** assumes that assets and liabilities are valued separately;
- **Opening balances principle** the opening balances of each financial year are identical with the closing balances of the previous financial year.
- **Non off-setting principle** assumes that assets can not be offset with liabilities, and income can not be offset with expenses, except for the offsetting allowed by CNVM Order 13/2011.
- **Substance over form** assumes that the information presented in the financial statements reflects the economic reality of the events and transactions and not only their legal form.
- **Materiality principle** assumes that any element that has a significant value is presented distinctly in the financial statements.

c. Use of estimates

The preparation of financial statements in accordance with CNVM Order 13/2011, with subsequent amendments, requires management to make estimates and assumptions that affect the reported value of assets and liabilities, disclosure of contingent assets and contingent liabilities at balance sheet date, and income and expenses reported to the respective financial year. Although the estimates and assumptions are made by management using the most reliable information available at balance sheet date, the actual results may differ from these estimates.

d. Going concern

These separate financial statements were prepared based on the going concern principle, which assumes that the Fund will continue its activity in the foreseeable future. In order to evaluate the applicability of this assumption, the Fund's administrator analyzes the forecasted future cash flows.

Based on this analysis, the administrator believes that the Fund will continue its activity in the foreseeable future, and, therefore, the applicability of the going concern principle is justified.

e. Foreign currency transactions

(i) Functional and presentation currency

The functional and presentation currency of the financial statements is the local currency, RON.

(ii) Translation of the transactions in foreign currency

The Fund's foreign currency transactions are translated to RON at the official exchange rate published by the National Bank of Romania ("NBR") for the transaction date. The foreign currency balances are translated to RON at the exchange rates published by NBR for balance sheet date. Any gains or losses resulting from settlement of foreign currency transactions and from conversion of foreign currency monetary assets and liabilities are recognised in the Income Statement.

The exchange rates of the main foreign currencies as at the closing date of the financial year were the following:

	31 December 2010	31 December 2011
1 Dollar (USD)	RON 3.2045	RON 3.3393
1 Euro (EUR)	RON 4.2848	RON 4.3197

f. Financial assets

(i) Classification

As at 31 December 2011 and 31 December 2010, the Fund classified as non-current financial assets all shares held in subsidiaries, investment in associates and other investments held as financial assets.

Subsidiaries are entities controlled by the Fund. Control exists when the Fund has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. In assessing control, potential voting rights that currently are exercisable are taken into account, when applicable.

Associates are those entities in which the Fund has significant influence, but not control or joint control, over the financial and operating policies. The existence of significant influence is determined by analysing the ownership structure of the companies in which the Fund holds 20 percent or more of the voting power of the investee, their articles of incorporation and the Fund's power to participate in the financial and operating policy decisions of the investee. The Fund does not exercise significant influence in a number of companies in which it holds between 20 and 50 percent of the voting power, where the Fund's rights as minority shareholder are protective in nature, and not participative and the major shareholder, or a group of shareholders holding majority ownership of the investee, operates without regard to the views of the Fund.

(ii) Recognition

The Fund recognises the financial assets as at the date when they have been transferred to the Fund and are recorded at acquisition cost, including brokerage fees (where applicable) or at the value determined based on the transfer documents.

In the case of listed companies, all securities purchases which involve a settlement in a certain period, determined according to the regulations in place or upon market agreement, are recognised at the date the transaction is recorded at the exchange where shares are traded (trade date).

In case of unlisted companies, the securities purchases are recognised at the date of registration at the Trade Register and securities disposals are accounted for at the date of the transfer of ownership.

Mergers of portfolio companies are recognised at the date when the merger is registered at the Trade Register.

The initial book value represents the value of the participating securities received by the Fund as contribution to the share capital and was calculated according to the specific laws for Fondul Proprietatea.

The cost (initial value) of financial assets which are contributed in kind by the Romanian State to the Fund's share capital is determined in accordance with the provisions of Law 247/2005 regarding the reform in property and justice, as well as certain adjacent measure, as amended ("Law 247/2005") with subsequent amendments, as follows:

- for the shares received at the Fund's establishment in December 2005, the cost is equal to:
 - the weighted average price of the last 90 trading days, provided that the last of the 90 trading days is not more than 60 days prior to 24 November 2005, for companies listed on a stock exchange and whose trading volume over the last 90 trading days represented at least 0.3% of their share capital;
 - the book value of the shareholders' equity at 31 December 2004, determined in accordance with statutory financial statements, multiplied by the Fund's holding, for unlisted companies and for listed companies whose trading volume over the last 90 trading days represented less than 0.3% of their share capital;
- for the shares received in June 2007, in accordance with GEO 81/2007, the cost is equal to:
 - the weighted average price of the last 90 trading days prior to 29 June 2007, for companies listed on a stock exchange and whose trading volume over the last 90 trading days represented at least 0.3% of their share capital;

h. Financial assets (continued)

- the book value of the shareholders' equity at 31 December 2006, determined in accordance with statutory financial statements, multiplied by the Fund's shareholding, for unlisted companies and for listed companies whose trading volume over the last 90 trading days represented less than 0.3% of their share capital;
- for the additional shares received in companies owned by the Romanian State (through the Fund and State authorities) and to which the State has made contributions in kind, which are received by the Fund so as not to dilute its shareholding in such companies, the cost for the Fund is determined at the nominal value of the shares received.

(iii) Measurement

Financial assets are initially recognised at acquisition cost.

Subsequent to the initial recognition, according to the provisions of CNVM Order 13/2011, with subsequent amendments, financial assets are carried in the balance sheet at historical cost, less accumulated adjustments for impairment.

As at balance sheet date, the carrying value (acquisition cost plus additions) should be compared with the recoverable value. The negative differences shall be recorded as impairment adjustments in a shareholders' equity account (account 1062 – Reserves related to impairment adjustments of financial assets), while the positive differences shall not be recorded.

For financial assets, the recoverable value is determined as follows:

- For listed securities, with an adequate liquidity (traded in the last 30 days before year end), it is calculated based on the last available closing price in the year.
- For unlisted securities or for illiquid listed securities, it is estimated using shareholders' equity as per the most recently available financial statements of the issuers (e.g.: semi-annual or annual financial statements), proportionally with the stake held by the Fund.

The management decides on the classification of the financial assets at the time of acquisition.

All equity investments of the Fund as at 31 December 2011 and 31 December 2010 were classified as non-current financial assets, as the Fund's investment objective is long-term capital appreciation via investments in equities or equities-linked securities.

(iv) Derecognition

The Fund derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or when it transfers the rights to receive the contractual cash flows on the financial asset in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred.

The derecognition of any financial asset disposed of is recognised on the date when ownership is transferred

g. Adjustment for the impairment of financial assets

The carrying value of the Fund's assets is reviewed at each balance sheet date to determine whether there are indications of impairment. If such indicators exist, the recoverable value of the Fund's assets is estimated. An adjustment for impairment is recorded if the carrying value of the asset exceeds its recoverable value. The adjustments for impairment of financial assets were recognised in year 2007 in the income statement, and subsequently, after the issuance of CNVM Order 11/2009, the Fund opted for the accounting policy to recognise these adjustments in the reserve account 1062 – "Reserves related to impairment adjustments of financial assets". This accounting policy is included in CNVM Order 13/2011 as well.

The impairment adjustment can be reversed if a change in the conditions existing at the time of determining the recoverable value occurred. The reversal of an impairment adjustment can only be made such that the net value of the asset does not exceed its historical book value. The adjustments for impairment are reversed as follows:

- to income, if the adjustments were initially recognised through income statement;
- by changing the reserve account 1062, if the adjustments were initially recognised directly in this account.

h. Cash and cash equivalents

Cash and cash equivalents are recorded in the balance sheet at cost. For the purposes of the Statement of Cash Flows, cash and cash equivalents include the petty cash, current accounts with banks and short term financial investments comprising bonds, placements in bank deposits with original maturity less than 3 months and securities purchased by REPO operations.

i. Provisions

The provisions are recognised when the Fund has a legal or implicit obligation resulted from past events, when in order to settle the obligation an outflow of resources embodying economic benefits is necessary and when a reliable estimate can be made with regard to the value of the obligation.

j. Employees' benefits

During the normal course of business, the Fund makes payments due to the state health, pensions and unemployment funds related to its employees in accordance with the regulations in force. All the employees are members of the pension plan of the Romanian State. Such costs are recognised in the Income Statement together with the recognition of the salaries.

The Fund does not operate any other pensions plan or post retirement benefits plan and therefore has no obligations regarding pensions

k. Taxation

The Fund records the current income tax liabilities based on the taxable income in the tax reporting, according to the relevant Romanian laws. The income tax rate for the year 2011 is 16% (2010: 16%).

l. Income recognition

(i) Income from investments

Dividend income paid by listed companies is recognised at the ex-dividend date. Dividend income distributed by unlisted companies is recorded on the date when such companies' General Shareholders Meetings approve dividends.

(ii) Interest income

Interest income is recognised according to the accrual principle, taking into consideration the interest due according to contractual clauses during the financial year, to the extent that it is certain that upon the due date the interest can be actually collected.

(iii) Income from sale of securities

Gains or losses from the disposal of the financial assets are recognised in the Income Statement at the date of derecognision of the financial assets.

.

m. Shares free of charge

The shares received free of charge from the companies in the portfolio are recognised at nominal value. According to the provisions of Law 247/2005 (title VII, article 9 paragraph (6)), with subsequent amendments, the cost of these free shares was partially used to cover the share capital subscribed and still unpaid by the Romanian State.

The shares received free of charge resulting from the incorporation of reserves of portfolio companies are recorded at nominal value as at the date of entering the portfolio of the respective shares. These shares are recorded in account 1065 - Reserves for securities received free of charge.

Free shares are recorded in accounting at the date when they are recorded with the Central Depositary (for listed shares) or Trade Register (for unlisted shares).

n. Treasury shares

The Fund recognises treasury shares (repurchases of own shares) at the date when the transaction is recorded at the exchange where shares are traded (trade date) and are recorded at acquisition cost, including brokerage fees.

o. Dividend payable

Dividends declared by the Fund are recorded as dividend payable when the Fund's General Shareholders Meeting approves them, as the Fund is then legally obliged to pay them.

According to the provisions of the legislation in force, the Fund is allowed to cancel the rights of shareholders to collect any dividends which have remained unclaimed 3 years after the date when the respective dividend distribution commenced. Upon cancellation, the Fund records the value of these dividends as income in the Income Statement. The Fund did not record any such income in year 2011 or in year 2010.

p. Value added tax

The Fund is not a taxable legal entity for the purposes of the provisions of the Fiscal Code. As a result, value added tax is recognised as part of the expenses for the acquisition of services or as part of the acquisition value for the purchases of goods (inventories or fixed assets).

7. FINANCING SOURCES (continued)

The total number of shareholders as at 31 December 2011 was 10,845.

The shares grant shareholders different voting rights, depending on the holder and the percentage held, as provided GEO 81 / 2007, Article 12. At the Fund's General Shareholders Meeting that took place on 23 November 2011, shareholders approved the elimination of any restrictions on voting rights (1 paid share = 1 vote). This will be effective after the approval of the new Constitutive Act of the Fund by CNVM. As at 31 December 2011, this Constitutive Act had not yet been approved by CNVM (it was approved on 12 January 2012).

Unpaid share capital represents the net value of certain contributions due from the Romanian State represented by the Ministry of Public Finance, as shareholder, to the Fund that were recorded in previous years as paid capital (based on Law 247/2005, with subsequent amendments).

The acquired shares can be cancelled and the share capital reduced following shareholders' approval.

At the General Shareholders Meetings on 23/25 November 2011, the Fund Manager proposed to cancel the treasury shares, but the proposal was not voted due to the lack of a quorum (a quorum of at least 50% of paid share capital is required for such a motion). 16. FINANCIAL RISK MANAGEMENT

Given the nature of its business, the Fund is exposed to various risks, which include: market risk, credit risk, liquidity risk, operational risk and the risks related to the economic environment. The management monitors the reduction of the potential adverse effect associated with these risk factors on the financial performance of the Fund.

After its establishment in December 2005, due to the specific nature of the Fund's activities which involved clarifications on legal matters resulting from the transfers of shares from the State, rather than active trading in the portfolio shares, a passive risk management approach was adopted by the Fund, from its inception until the commencement of Fund Manager's contract on 29 September 2010. In this earlier period no formal risk policies and procedures were in place.

With effect from 29 September 2010 the Fund Manager implemented financial risk management procedures consistent with those applied globally by Franklin Templeton Investments.

i) Market risk

The market risk includes foreign currency risk, interest rate risk and price risk.

Foreign currency risk

The Fund can make investments in financial instruments or perform transactions denominated in foreign currency. As a result, the Fund is exposed to the risk that fluctuations in exchange rates can have an adverse effect on the value of the net assets of the Fund denominated in foreign currency.

As at 31 December 2011, the main foreign currency exposure derived from the Fund's investment in shares with a carrying value of EUR 38,463,298 (RON 166,149,792 equivalent). Cash accounts and receivables denominated in foreign currency are not significant, only amounting to EUR 7,824 and EUR 399,879 respectively.

The Fund considers that its functional currency is the local currency (RON).

Interest rate risk

The majority of the financial assets of the Fund are not interest bearing. The interest bearing financial assets (deposits and treasury bills) have generally short term maturity, deposits up to 3 months and treasury bills up to 12 months. As a result, the Fund has a limited exposure to variations in interest rates.

Price risk

Price risk is the risk that the value of the securities fluctuates as a result of changes occurring on the capital market, and it is determined by factors specific to an issuer, industry, country or region or that otherwise influence the capital market overall. This is the most significant source of risk and variability in the value of the Fund.

This risk has become more material in recent years, especially from the second part of 2008, given the extremely large reductions in value of the stock exchange quotations for some of the securities in the Fund's portfolio. It has been necessary to book impairment adjustments in certain cases during recent years, and these negatively influenced shareholders' equity. During 2009, 2010 and the first part of 2011 impairment adjustments previously booked have been partially reversed due to market recoveries, but in the second part of 2011 significant impairment adjustments have been recorded for some of the listed equity investments of the Fund.

ii) Credit risk

Credit risk is the risk of financial loss to the Fund if counterparties to financial instruments fail to meet their contractual obligations, and arises principally from cash and deposits with banks, treasury bills and dividends receivable.

16. FINANCIAL RISK MANAGEMENT (continued)

For treasury bills held, the credit risk is assessed as low to moderate, given that their issuer is the Romanian State through the Ministry of Public Finance.

Cash held by the Fund that is not invested in portfolio companies or treasury bills may be invested in short term bank deposits. After the Fund's management was taken over by the Fund Manager, a formal policy regarding bank counterparty risks and limits was established. The Fund only establishes new deposits with financial institutions with credit ratings above investment grade (BBB- or better). The counterparty credit risk is also diversified by allocating the cash and cash equivalents across several banks. The selection of financial institutions as deposit takers was made and the exposure limits were decided upon based on their credit ratings.

iii) Liquidity risk

Liquidity risk is the risk that the Fund will not be able to meet its financial obligations as they fall due. The Fund's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Fund's reputation.

The Fund's equity investments include unlisted securities, which are not traded in a regulated public market and generally may be considered illiquid. As a result, the Fund may not be able to liquidate quickly some of its investments in these instruments in order to meet its liquidity requirements, or to respond to specific events such as deterioration in the credit worthiness of any particular issuer.

The Fund's listed equity securities are listed on the Bucharest Stock Exchange or Vienna Stock Exchange. However, not all the shares listed on the Bucharest Stock Exchange are considered liquid due to insufficient volumes of transactions.

The Fund prudently manages liquidity risk by maintaining sufficient liquid assets to finance current liabilities.

iv) Operational risks

Operational risk is the risk of direct or indirect loss arising from a wide variety of causes associated with the Fund's processes, personnel, technology and infrastructure, and from external factors other than credit, market and liquidity risks such as those arising from legal and regulatory requirements and generally accepted standards of corporate behaviour. Operational risks arise from all of the Fund's operations.

The Fund's objective is to manage operational risk so as to balance the avoidance of financial losses and damage to the Fund's reputation with overall cost effectiveness and to avoid control procedures that restrict initiative.

v) Operating environment

The process of risk repricing during 2007 and 2008 as well as during the second part of 2011 in the international financial markets severely affected the performance of those markets, including the Romanian financial market, and fostered heightened uncertainty with regard to economic developments going forward.

The ongoing global credit and liquidity crisis has resulted in, among other things, lower level and difficult access to the capital market funding and lower liquidity levels across the Romanian banking sector.

Ongoing fears that the deterioration of financial conditions could contribute, at a later stage to a further retrenchment in confidence, prompted a coordinated effort of governments and central banks to adopt special measures aimed at countering a vicious circle of growing risk aversion and helping minimise the effects of the financial crisis and finally restoring normal market conditions. However, political and economic turmoil in the emerging markets is expected to continue, and this can impact the value of the Romanian economy, and consequently the Fund's portfolio companies and its shares.

17. CONTINGENT ASSETS AND LIABILITIES

As at 31 December 2011 the Fund was involved in certain litigations, either as defendant or claimant. Fund discloses in the financial statements those litigations which may have significant effects on the Fund's financial position or profitability. The most important litigations were the following:

1. The Fund is involved in several litigations regarding delay penalties requested from companies which have not yet paid dividends to the Fund for the year 2005 (some of the dividends have since been paid to the Fund pursuant to the Fund winning the law suits). Such litigations are yet to be resolved. During 2011 the most common practice of the Romanian courts was to accept the Fund's claims.

The claims filed by the Fund are in compliance with the provisions of Law 31/1990 as republished and further amended and these amounts should be due and paid to the Fund. These amounts should only be recognised as revenues when their recoverability becomes highly probable (the Court rules irrevocably in Fund's favour).

2. There is currently a court litigation involving the Fund and Nuclearelectrica.

In this file the Fund has sued Nuclearelectrica and the Ministry of Economy and Commerce (now the Ministry of Economy, Trade and Business Environment) and asked the court to record the transfer in the Nuclearelectrica's shareholders register of a total of 20,077,953 shares from the Ministry portfolio to the Fund portfolio in order to update the initial stake of the Fund in Nuclearelectrica, taking into account the share capital increases that took place between 1 February 2006 and 13 November 2007. The litigation was solved at the first stage by the Bucharest Court with the Court ruling against the Fund. The Fund has appealed the decision of the Court and the Bucharest Court of Appeal ruled against the Fund The Fund will file the second appeal asking High Court of Cassation and Justice to issue the final and irrevocable decision.

For safety reasons, given that the decision issued by the first court in this case is enforceable, the Fund has blocked a total of 340,796,918 shares, in amount of RON 340,796,918 being computed based on the valuation report issued in October 2007 by an independent evaluator (Finevex SRL Constanta) for the shares presumed to be owned by the Fund in Nuclearelectrica. The Fund considered that in fact the Ministry of Public Finance has not contributed to the share capital of the Fund with this amount. After the courts will issue an irrevocable decision regarding this case the Fund will propose the shareholders measures in order to solve the issue of unpaid share capital, if it is the case.

As at 31 December 2011 the Fund owned 9.72% of the share capital of the Nuclearelectrica, as recorded at the Trade Register Office.

3. On the role of the courts there are many litigations started by the Fund against the merger plans for creating Hidroenergetica and Electra; in many of these cases the courts have decided to suspend the merger and in two of them the courts ruled in favour of the Fund and decided to block the merger plan. The merger process and the creation of Electra and Hidroenergetica are blocked and the Romanian Government decided to renounce at this project. In October 2011, the Romanian Government repealed its previous decision regarding the reorganization of the electricity generation sector for creating Electra and Hidroenergetica and the Government approved as an alternative plan for the restructuring of the electricity generation sector, the creation of Complexul Energetic Oltenia by merging Complexul Energetic Turceni, Complexul Energetic Rovinari and Complexul Energetic Craiova with Societatea Nationala a Lignitului Oltenia.

17. CONTINGENT ASSETS AND LIABILITIES (continued)

4. Some minority shareholders of the Fund have filed claims against the Fund with the Court requesting the cancellation of certain resolutions of the General Shareholders Meeting.

Other contingencies of the Fund included:

- 1. The Fund shall receive the following amounts from the Romanian State:
 - a the amount resulted from the trading on the Romanian or foreign stock exchange markets of the first 3% of Romtelecom SA shares;
 - b 20% of the amounts resulting from the privatization of Romtelecom SA;
 - c 9.9% of the amounts resulting from the privatisation of C.E.C. SA;

These amounts should be recorded as payments for the unpaid capital or as increases of the share capital by the Romanian state once they are collected, with the approval of shareholders, according to the legislation in force.

2 The receivables from World Trade Center Bucharest SA:

Section II, Article 4 of GEO. 81/2007 stipulates the transfer from AVAS to the Fund of receivables from World Trade Center Bucharest SA amounting to USD 68,814,198 (including the original principal and related interest and penalties) on 29 June 2007.

On 1 October 2007 a reception minute was concluded between AVAS and the Fund based on which all documents related to the receivables due from World Trade Center Bucharest SA were transferred to the Fund.

On 4 October 2007, the Fund notified World Trade Center Bucharest SA regarding the cession of the receivables. Meanwhile, the transfer was registered with the Electronic Archive for Pledges.

Currently, World Trade Center Bucharest SA is the object of insolvency procedure, the next hearing being set for 28 March 2012.

In 2008, World Trade Center Bucharest SA paid USD 200,000 to the Fund, in 2009 USD 200,000 and in 2010 USD 110,130.69, EUR 148,700.76, RON 8,724,887.92. No such payments have been made to the Fund during 2011. In accordance with GEO 81/2007, these cash receipts reduced the balance of the receivables in respect of equity contributions.

Given the uncertainties regarding their recoverability, the World Trade Center Bucharest SA receivables were recognised on receipt basis in the Fund's financial statements.

18. SUBSEQUENT EVENTS

Voting rights restriction cancellation

On 23 November 2011 the Extraordinary General Shareholders Meeting approved a number of amendments to the Constitutive Act, one of the most important being the cancellation of the restriction of voting rights. The new Constitutive Act with the restriction rights cancelled was approved by CNVM on 12 January 2012.

Since 13 January 2012, when the new Constitutive Act became effective, the restrictions of the voting rights related to the number of shares owned by the Fund's shareholders were eliminated and the principle of one paid share is equal to one voting right is now applied.

A new permanent legal representative of the Fund

On 23 November 2011 the Extraordinary General Shareholders Meeting approved Oana Valentina Truţa as the third permanent legal representative of the Fund. The other two permanent legal representatives are Grzegorz Maciej Konieczny and Adrian Cighi, appointed by shareholders on September 2010.

The appointment is effective beginning with 19 January 2012, the date of the registration with the Trade Register.

18. SUBSEQUENT EVENTS (continued)

The addendum to the Investment Management Agreement

On 23 November 2011 the Ordinary General Shareholders Meeting approved the Addendum to the Investment Management Agreement. The change refers to the payment of Fund Manager's fees on a quarterly basis, starting 1 January 2012 (previously the fees were paid annually). The calculation of the fees are based on the number shares in issue multiplied by the average market price of the Fund's shares calculated for the respective quarter.

The change of the paid-up capital of the Fund

Since 2 February 2012, the paid-up capital of the Fund increased by RON 4,985,760 to RON 13,412,554,856, while its subscribed capital remained unchanged at RON 13,778,392,208. The increase in the paid-up capital reflects a reduction in the unpaid share capital held by the Romanian state due to the receipt by the Fund of 498,576 shares in Hidroelectrica following a share increase by that company relating to the value of land for which Hidroelectrica obtained title deeds.

To the shareholders of Fondul Proprietatea S.A. Bucharest, Romania

INDEPENDENT AUDITOR'S REPORT

Report on the separate financial statements

1. We have audited the accompanying separate financial statements of S.C. Fondul Proprietatea S.A. (the "Fund") which comprise the separate statement of financial position as of December 31, 2011, and the separate statement of comprehensive income, separate statement of changes in shareholder's equity and separate statement of cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information.

Management's responsibility for the separate financial statements

2 Management is responsible for the preparation and fair presentation of these separate financial statements in accordance with International Financial Reporting Standards as adopted by the EU, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

- 3 Our responsibility is to express an opinion on these separate financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurances about the separate financial statements are free from material misstatement.
- An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the separate financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the separate financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the separate financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the management, as well as evaluating the overall presentation of the separate financial statements.
- 5 We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

6 In our opinion, the accompanying separate financial statements present fairly, in all material respects, the separate financial position of S.C. Fondul Proprietatea S.A. as at December 31, 2011, and its separate financial performance and its separate cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the EU.

Emphasis of matter

- We draw attention to Note 2 (a) to the separate financial statements which states that consolidated financial statements of Fondul Proprietatea prepared in accordance with International Financial Reporting Standards, as adopted by European Union have not yet been published. Notes 2 to the separate financial statements explain when consolidated financial statements will be published and the method of accounting and other disclosures related to unconsolidated subsidiaries respectively. Our opinion is not modified in respect of this matter.
- We draw attention to the fact that during 2011 a number of major economies around the world have experienced strong volatility in the capital markets and severe restrictions in the credit markets. As a consequence of the recent market turmoil in capital and credit markets both globally and in Romania, notwithstanding any potential economic stabilization measures that may be put into place by the State, economic uncertainties arose surrounding the continual availability and cost of credit for the Fund's counterparties, future development of the markets and demand for goods and services they produce. The potential for economic uncertainties to continue in the foreseeable future and, as a consequence, the potential that assets of the Fund may be not recovered at their carrying amount in the ordinary course of business, and a corresponding impact on the Fund's profitability cannot be estimated reliably as of the date of this report. Our opinion is not modified in respect of this matter.

Other matters

9 This report is made solely to the Fund's shareholders, as a body. Our audit work has been undertaken so that we might state to the Fund's shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Fund and the Fund's shareholders as a body, for our audit work, for this report, or for the opinion we have formed.

1. General information

Fondul Proprietatea S.A. (referred to as "Fondul Proprietatea" or "the Fund") is an undertaking for collective investments, in the form of a closed end investment company, established in accordance with Law 247/2005 and Government Decision 1481/2005 and registered in Bucharest on 28 December 2005. The address of the Fund's registered office is 78 - 80, Buzești Street, 7th Floor, District 1, Bucharest.

The Fund undertakes its activities in accordance with Law 247/2005 regarding the reform in property and justice, as well as certain adjacent measures, as amended, Law 297/2004 regarding the securities market, as amended, and Law 31/1990 regarding companies, as republished and amended.

In accordance with its statute, the main activity of the Fund is the management and administration of its portfolio. The Fund undertakes other additional and related activities, according to the regulations in force.

The Fund was established to allow the payment in shares equivalent of compensations in respect of abusive expropriations undertaken by the Romanian State during the communist period, when properties were not returned in kind.

Franklin Templeton Investment Management Ltd United Kingdom Bucharest Branch ("Fund Manager") was appointed on 29 September 2010 as the Fund Manager and Sole Director of the Fund.

Since 25 January 2011 Fondul Proprietatea has been a listed company on the spot regulated market managed by the Bucharest Stock Exchange in Tier I (Shares) of the Securities Sector of the market, under ISIN number ROFPTAACNOR5 with the market symbol "FP".

2. Basis of preparation

(a) Statement of compliance

These separate financial statements have been prepared in accordance with International Financial Reporting Standards as adopted by European Union (IFRS).

The Fund has prepared these financial statements in order to provide users of the Fund's financial reports with supplementary financial information on the Fund's financial position. According with the requirements of the legislation in force the Fund will prepare and publish at a later date the consolidated financial statements of the group.

(all amounts are in RON unless otherwise stated)

2. Basis of preparation (continued)

(b) Basis of measurement

The separate financial statements have been prepared on the historical cost basis except for equity investments that are listed on an active market and treasury bills, which are measured at fair value.

(c) Functional and presentation currency

These financial statements are presented in Romanian Lei (RON), which is the Fund's functional currency. All financial information presented in RON has been rounded to the nearest unit.

(d) Use of estimates

The preparation of financial statements in accordance with International Financial Reporting Standards requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

Information about significant areas of estimation uncertainty and critical judgements in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements is included in the following notes:

- Note 5 Financial risk management;
- Note 11 Other operating expenses;
- Note 18 Valuation of equity investments;
- Note 19 Recognition of deferred tax assets;
- Note 22 Other liabilities:
- Note 24 Contingencies.

(e) Reclassification of comparative information

The Fund reclassified certain income and expense items in the Statement of comprehensive income for the year ended 31 December 2010, in order to be consistent with current year presentation.

(all amounts are in RON unless otherwise stated)

3. Significant accounting policies

The accounting policies set out below have been applied consistently to all periods presented in these financial statements.

(a) Subsidiaries and associates

Subsidiaries are entities controlled by the Fund. Control exists when the Fund has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. In assessing control, potential voting rights that currently are exercisable are taken into account, when applicable.

Associates are those entities in which the Fund has significant influence, but not control or joint control, over the financial and operating policies. The existence of significant influence is determined by analysing the ownership structure of the companies in which the Fund holds 20 percent or more of the voting power of the investee, their articles of incorporation and the Fund's power to participate in the financial and operating policy decisions of the investee. The Fund does not exercise significant influence in a number of companies in which it holds between 20 and 50 percent of the voting power, where the Fund's rights as minority shareholder are protective in nature, and not participative and where the major shareholder, or a group of shareholders holding majority ownership of the investee, operates without regard to the views of the Fund.

The lists of subsidiaries and associates at 31 December 2011 are disclosed in note 25 (c) and (d).

In these separate financial statements, investments in subsidiaries and associates are accounted for in accordance with IAS 39 *Financial Instruments: Recognition and Measurement*, as available-for-sale financial assets (see accounting policy 3 (c) below).

(b) Foreign currency

Transactions in foreign currencies are translated into the functional currency of the Fund at exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are retranslated to the functional currency at the exchange rate at that date. The foreign currency gain or loss on monetary items is the difference between amortised cost in the functional currency at the beginning of the period, adjusted for effective interest and payments during the period, and the amortised cost in foreign currency translated at the exchange rate at the end of the period. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are retranslated to the functional currency at the exchange rate at the date that the fair value was determined. Foreign currency differences arising on retranslation are recognised in profit or loss.

The exchange rates of the main foreign currencies published by the National Bank of Romania at 31 December 2011 were as follows: 4.3197 RON/EUR and 3.3393 RON/USD (31 December 2010: 4.2848 RON/EUR and 3.2045 RON/USD).

(all amounts are in RON unless otherwise stated)

3. Significant accounting policies (continued)

(c) Financial assets and liabilities

(i) Recognition

The Fund recognises financial assets and liabilities on the date it becomes a party to the contractual provisions of the instrument.

Financial assets and liabilities are recognised initially at fair value plus any directly attributable transaction costs, except for the investments in equity securities whose fair value cannot be reliably measured, which are recognised initially at cost.

The cost of equity investments which are contributed in kind by the Romanian State to the Fund's share capital is determined in accordance with the provisions of Law 247/2005, as amended by Government Emergency Ordinance ("G.E.O.") 81/2007, as follows:

- for the shares received at the Fund's establishment in December 2005, the cost is equal:
 - either to the weighted average price of the last 90 trading days, provided that the last of the 90 trading days is not more than 60 days prior to 24 November 2005, for companies listed on a stock exchange and whose trading volume over the last 90 trading days represented at least 0.3% of their share capital;
 - or to the book value of the shareholders' equity at 31 December 2004, according to the statutory financial statements, multiplied by the Fund's shareholding, for unlisted companies and for listed companies whose trading volume over the last 90 trading days represented less than 0.3% of their share capital;
- for the shares received in June 2007, in accordance with G.E.O. 81/2007, the cost is equal:
 - either to the weighted average price of the last 90 trading days prior to 29 June 2007, for companies listed on a stock exchange and whose trading volume over the last 90 trading days represented at least 0.3% of their share capital;
 - or to the book value of the shareholders' equity at 31 December 2006, determined in accordance with statutory financial statements, multiplied by the Fund's shareholding, for unlisted companies and for listed companies whose trading volume over the last 90 trading days represented less than 0.3% of their share capital;
- for the additional shares received in companies owned by the Romanian State and to which the
 State has made contributions in kind, which are received by the Fund so as not to dilute its
 shareholding in such companies, the cost for the Fund is determined at the par value of the shares
 received.

Mergers of portfolio companies are recognised at the date when the merger is registered at the Trade Register.

(ii) Classification

See accounting policies 3(d), (e), (f) and (g).

(all amounts are in RON unless otherwise stated)

3. Significant accounting policies (continued)

(c) Financial assets and liabilities (continued)

(iii) Derecognition

The Fund derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or when it transfers the rights to receive the contractual cash flows on the financial asset in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred. Any interest in transferred financial assets that is created or retained by the Fund is recognised as a separate asset or liability.

The Fund derecognises a financial liability when its contractual obligations are discharged or cancelled or expire.

(iv) Offsetting

Financial assets and liabilities are set off and the net amount presented in the statement of financial position when, and only when, the Fund has a legal right to set off the amounts and intends either to settle on a net basis or to realise the asset and settle the liability simultaneously.

Income and expenses are presented on a net basis only when permitted by the accounting standards, or for gains and losses arising from a group of similar transactions.

(v) Amortised cost measurement

The amortised cost of a financial asset or liability is the amount at which the financial asset or liability is measured at initial recognition, minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between the initial amount recognised and the maturity amount, minus any reduction for impairment.

(vi) Fair value measurement

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction on the measurement date.

When available, the Fund measures the fair value of an instrument using quoted prices in an active market for that instrument at the reporting date. A market is regarded as active if quoted prices are readily and regularly available and represent actual and regularly occurring market transactions on an arm's length basis.

If a market for an equity security is not active, the Fund tries to establish fair value using a valuation technique.

(all amounts are in RON unless otherwise stated)

3. Significant accounting policies (continued)

(c) Financial assets and liabilities (continued)

The best evidence of the fair value of a financial instrument at initial recognition is the transaction price, i.e., the fair value of the consideration given or received, unless the fair value of that instrument is evidenced by comparison with other observable current market transactions in the same instrument (i.e., without modification or repackaging) or based on a valuation technique whose variables include only data from observable markets.

When transaction price provides the best evidence of fair value at initial recognition, the financial instrument is initially measured at the transaction price and any difference between this price and the value initially obtained from a valuation model is subsequently recognised in profit or loss depending on the individual facts and circumstances of the transaction but not later than when the valuation is supported wholly by observable market data or the transaction is closed out.

Assets are measured at a bid price and liabilities are measured at an asking price.

(vii) Identification and measurement of impairment

At each reporting date the Fund assesses whether there is objective evidence that financial assets are impaired. Financial assets are impaired when objective evidence demonstrates that a loss event has occurred after the initial recognition of the asset, and that the loss event has an impact on the future cash flows of the asset that can be estimated reliably.

Impairment losses on assets carried at amortised cost are measured as the difference between the carrying amount of the financial asset and the present value of estimated future cash flows discounted at the asset's original effective interest rate. Losses are recognised in profit or loss and reflected in an allowance account against the financial assets. Interest on the impaired asset continues to be recognised through the unwinding of the discount. When a subsequent event causes the amount of impairment loss to decrease, the decrease in impairment loss is reversed through profit or loss.

Impairment losses on equity investments carried at fair value are recognised by transferring the cumulative loss that has been recognised directly in equity to profit or loss. The cumulative loss that is removed from equity and recognised in profit or loss is the difference between the acquisition cost and the current fair value, less any impairment loss previously recognised in profit or loss. If, in a subsequent period, the fair value of an impaired equity investment increases, the recovery is recognised directly in equity.

Impairment losses on equity investments carried at cost (where their fair value cannot be reliably measured) are measured as the difference between the carrying amount and an estimate of present value of future cash flows, determined using generally accepted valuation techniques (e.g. valuation of equity investment using market approach).

Losses are recognised in profit or loss and are not reversed.

(all amounts are in RON unless otherwise stated)

3. Significant accounting policies (continued)

(c) Financial assets and liabilities (continued)

In determining that equity investments are impaired, the Fund considers all relevant factors, such as significant or prolonged decline in fair value below cost, market and industry conditions, to the extent that they influence the recoverable amount of the investment, financial conditions and near-term prospects of the issuer, including any specific adverse events that may influence the issuer's operations, recent losses of the issuer, qualified independent auditor's report on the issuer's most recent financial statements etc.

(d) Cash and deposits with banks

Cash includes notes and coins on hand and current accounts held with banks.

Deposits with banks include deposits with original maturities of less than three months and deposits with original maturities of more than three months and less than one year.

Cash and deposits with banks are carried at amortised cost in the statement of financial position.

Deposits with banks with original maturities of less than three months are included as a component of cash and cash equivalents for the purpose of the cash flow statement.

(e) Held to maturity

Held-to-maturity investments are non-derivative assets with fixed or determinable payments and fixed maturity that the Fund has the positive intent and ability to hold to maturity, and which are not designated as at fair value through profit or loss or as available-for-sale.

Held-to-maturity investments are carried at amortised cost using the effective interest method. Any sale or reclassification of a more than insignificant amount of held-to-maturity investments not close to their maturity would result in the reclassification of all held-to-maturity investments as available-for-sale, and prevent the Fund from classifying investment securities as held-to-maturity for the current and the following two financial years.

The Fund did not classify any investments as held-to-maturity as at 31 December 2011 and 31 December 2010.

(f) Available-for-sale financial assets

The Fund's investments in treasury bills and in equity securities are classified as available-for-sale financial assets.

(i) Equity investments carried at fair value

Subsequent to initial recognition, equity investments (other than those described at section (ii) below) are measured at fair value and changes therein, other than impairment losses, are recognised directly in equity.

(all amounts are in RON unless otherwise stated)

3. Significant accounting policies (continued)

(f) Available-for-sale financial assets (continued)

When an investment is derecognised, the cumulative gain or loss in equity is transferred to profit or loss.

(ii) Equity investments carried at cost

Investments in equity securities that do not have a quoted market price in an active market, and whose fair value cannot be reliably measured using a valuation technique, are measured at cost, subject to impairment testing.

(g) Other financial assets and liabilities

Other financial assets and liabilities are measured at amortised cost using the effective interest method, less any impairment losses (in case of financial assets).

(h) Property and equipment

(i) Recognition and measurement

Items of property and equipment are measured at cost less accumulated depreciation and accumulated impairment losses.

Cost includes expenditure that is directly attributable to the acquisition of the asset.

(ii) Subsequent costs

The cost of replacing part of an item of property and equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Fund and its cost can be measured reliably. The carrying amount of the replaced part is derecognised. The costs of the day-to-day servicing of property and equipment are recognised in profit or loss as incurred.

(iii) Depreciation

Depreciation is recognised in profit or loss on a straight-line basis over the estimated useful lives of each part of an item of property and equipment. Land is not depreciated.

The estimated useful lives for the current and comparative period are as follows:

Leasehold improvements 3 years
 IT equipment 3 years
 Vehicles 5 years
 Furniture and other equipment 5-10 years

Depreciation methods, useful lives and residual values are reviewed at each reporting date.

(all amounts are in RON unless otherwise stated)

3. Significant accounting policies (continued)

(i) Impairment of non-financial assets

The carrying amounts of the Fund's non-financial assets, other than deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

An impairment loss is recognised if the carrying amount of an asset exceeds its recoverable amount. Impairment losses are recognised in profit or loss.

The recoverable amount of an asset is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

Impairment losses recognised in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

(j) Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of ordinary shares are recognised as a deduction from equity, net of any tax effect.

(k) Provisions

A provision is recognised if, as a result of a past event, the Fund has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

(l) Dividend income

Dividend income relating to listed equity investments is recognised in profit or loss on the exdividend date. Income distributions from unlisted equity investments are recognised in profit or loss as dividend income when declared.

When the Fund receives or chooses to receive dividends in the form of additional shares rather than cash, the dividend income is recognised for the amount of the cash dividend alternative with the corresponding debit treated as an additional investment.

(all amounts are in RON unless otherwise stated)

3. Significant accounting policies (continued)

(l) Dividend income (continued)

When bonus shares are received with no cash alternative and only certain shareholders are granted additional shares, the shares received are measured at fair value and a corresponding amount of dividend income is recognised. However, if all shareholders receive bonus shares in proportion to their shareholdings, no dividend income is recognised as the fair value of the Fund's interest should be unaffected by the bonus issue.

The Fund recognises dividends from subsidiaries and associates as income in its separate financial statements when its right to receive the dividend is established.

For late dividend payments, the Fund initiates legal recovery measures (conciliation, litigations etc.). The Fund is entitled to charge penalties for overdue net dividends; applying the legal penalty interest rate according to the legislation in force. Penalty income on dividends is recognised in the financial year when collection is virtually certain.

Dividend income is presented gross of dividend withholding taxes, which are recognised as income taxes.

(m) Interest

Interest income and expense are recognised in profit or loss using the effective interest method. The effective interest rate is the rate that exactly discounts the estimated future cash payments and receipts through the expected life of the financial asset or liability (or, where appropriate, a shorter period) to the carrying amount of the financial asset or liability.

Interest income relates to current accounts, deposits held with banks and treasury bills.

(n) Income from sale of securities

Gains or losses from the disposal of the financial assets are recognised in profit or loss at the date of derecognising of the financial assets.

(o) Foreign currency gains and losses

Foreign currency gains and losses are reported on a net basis and include realised and unrealised foreign exchange differences. The majority of such gains and losses relate to the current accounts and deposits in foreign currency held with banks.

(p) Expenses

All expenses are recognised in profit or loss on an accrual basis.

(all amounts are in RON unless otherwise stated)

3. Significant accounting policies (continued)

(q) Income tax

Income tax expense comprises current and deferred tax. Current tax includes also dividend withholding taxes.

Income tax expense is recognised in profit or loss except to the extent that it relates to items recognised directly in equity, in which case it is recognised in equity.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognised for the following temporary differences: the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit, and differences relating to investments in subsidiaries and jointly controlled entities to the extent that it is probable that they will not reverse in the foreseeable future. Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date. Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realised simultaneously.

A deferred tax asset is recognised to the extent that it is probable that future taxable profits will be available against which the temporary difference can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

Additional income taxes that arise from the distribution of dividends by the Fund are recognised at the same time as the liability to pay the related dividend is recognised.

The effect on deferred tax of any changes in tax rates is charged to profit or loss, except to the extent that it relates to items previously charged or credited directly to equity.

The applicable tax rates are 16% (standard tax rate and also, the dividend withholding tax).

(r) Employee benefits

(i) Pensions and other post retirement benefits

The Fund, in the normal course of business, makes payments to the Romanian State on behalf of its employees. All employees of the Fund are members of the Romanian State pension plan.

(all amounts are in RON unless otherwise stated)

3. Significant accounting policies (continued)

(r) Employee benefits (continued)

The Fund does not operate any other pension scheme or post retirement benefit plan and, consequently, has no obligation in respect of pensions. In addition, the Fund is not obliged to provide further benefits to its employees.

(ii) Termination benefits

Termination benefits are recognised as an expense when the Fund is demonstrably committed, without realistic possibility of withdrawal, to a formal detailed plan to either terminate employment before the normal retirement date, or to provide termination benefits as a result of an offer made to encourage voluntary redundancy. Termination benefits for voluntary redundancies are recognised as an expense if the Fund has made an offer encouraging voluntary redundancy, it is probable that the offer will be accepted, and the number of acceptances can be estimated reliably.

(s) Treasury shares

The Fund recognises the treasury shares (repurchases of own shares) at the date when the transaction is recorded at the exchange where shares are traded (trade date); treasury shares are recorded at acquisition cost, including brokerage fees.

(t) Dividend payable

Dividends declared by the Fund are recorded as dividend payable when the Fund's General Shareholders Meeting approves them, as the Fund is then legally obliged to pay them.

According to the provisions of the legislation in force, the Fund is allowed to cancel the rights of shareholders to collect any dividends which have remained unclaimed 3 years after the date when the respective dividend distribution commenced. Upon cancellation, the Fund records the value of these dividends as income in the Income Statement. The Fund did not record any such income in year 2011 or in year 2010.

(u) Standards and Interpretations effective in the current period

The following amendments to the existing standards issued by the International Accounting Standards Board and adopted by the European Union ("EU") are effective for the current period:

• Amendments to IAS 24 "Related Party Disclosures" - Simplifying the disclosure requirements for government-related entities and clarifying the definition of a related party, adopted by the EU on 19 July 2010 (effective for annual periods beginning on or after 1 January 2011);

(all amounts are in RON unless otherwise stated)

3. Significant accounting policies (continued)

(u) Standards and Interpretations effective in the current period (continued)

- Amendments to IAS 32 "Financial Instruments: Presentation" Accounting for rights issues, adopted by the EU on 23 December 2009 (effective for annual periods beginning on or after 1 February 2010);
- Amendments to various standards and interpretations "Improvements to IFRSs (2010)" resulting from the annual improvement project of IFRS published on 6 May 2010 (IFRS 1, IFRS 3, IFRS 7, IAS 1, IAS 27, IAS 34, IFRIC 13) primarily with a view to removing inconsistencies and clarifying wording, adopted by the EU on 18 February 2011 (amendments are to be applied for annual periods beginning on or after 1 July 2010 or 1 January 2011 depending on standard/interpretation);
- IFRIC 19 "Extinguishing Financial Liabilities with Equity Instruments", adopted by the EU on 23 July 2010 (effective for annual periods beginning on or after 1 July 2010).

The adoption of these amendments to the existing standards has not led to any changes in the Fund's accounting policies.

(v) Standards and Interpretations issued by IASB and adopted by the EU but not yet effective

At the date of authorisation of these financial statements the following standards, revisions and interpretations adopted by the EU were in issue but not yet effective:

• Amendments to IFRS 7 "Financial Instruments: Disclosures" - Transfers of Financial Assets, adopted by the EU on 22 November 2011 (effective for annual periods beginning on or after 1 July 2011).

The Fund anticipates that the adoption of these standards, revisions and interpretations will have no material impact on its financial statements in the period of initial application.

(w) Standards and Interpretations issued by IASB but not yet adopted by the EU

At present, IFRS as adopted by the EU do not significantly differ from regulations adopted by the International Accounting Standards Board (IASB) except from the following standards, amendments to the existing standards and interpretations, which were not endorsed for use as at the date of authorisation of these financial statements:

• *IFRS 9 "Financial Instruments"* (effective for annual periods beginning on or after 1 January 2015),

(all amounts are in RON unless otherwise stated)

3. Significant accounting policies (continued)

(w) Standards and Interpretations issued by IASB but not yet adopted by the EU (continued)

- *IFRS 11 "Joint Arrangements"* (effective for annual periods beginning on or after 1 January 2013):
- IFRS 12 "Disclosures of Involvement with Other Entities" (effective for annual periods beginning on or after 1 January 2013);
- *IFRS 13 "Fair Value Measurement"* (effective for annual periods beginning on or after 1 January 2013):
- *IAS 27 (revised in 2011) "Separate Financial Statements"* (effective for annual periods beginning on or after 1 January 2013);
- *IAS 28 (revised in 2011) "Investments in Associates and Joint Ventures"* (effective for annual periods beginning on or after 1 January 2013);
- Amendments to IFRS 7 "Financial Instruments: Disclosures" Offsetting Financial Assets and Financial Liabilities (effective for annual periods beginning on or after 1 January 2013);
- Amendments to IFRS 9 "Financial Instruments" and IFRS 7 "Financial Instruments: Disclosures" Mandatory Effective Date and Transition Disclosures;
- Amendments to IAS 1 "Presentation of financial statements" Presentation of Items of Other Comprehensive Income (effective for annual periods beginning on or after 1 July 2012);
- Amendments to IAS 12 "Income Taxes" Deferred Tax: Recovery of Underlying Assets (effective for annual periods beginning on or after 1 January 2012);
- Amendments to IAS 32 "Financial instruments: presentation" Offsetting Financial Assets and Financial Liabilities (effective for annual periods beginning on or after 1 January 2014).

The Fund anticipates that the adoption of these standards, amendments to the existing standards and interpretations, except for IFRS 9, will have no material impact on its financial statements in the period of initial application.

At the same time, hedge accounting regarding the portfolio of financial assets and liabilities, whose principles have not been adopted by the EU, is still unregulated.

According to the Fund's estimates, application of hedge accounting for the portfolio of financial assets or liabilities pursuant to *IAS 39: "Financial Instruments: Recognition and Measurement"*, would not significantly impact the financial statements, if applied as at the balance sheet date.

(all amounts are in RON unless otherwise stated)

4. Financial risk management

The Fund's investment portfolio comprises listed and unlisted equity investments.

The Fund's investing activities expose it to various types of risks that are associated with the financial instruments and markets in which it invests. The most important types of financial risks to which the Fund is exposed are market risk, credit risk and liquidity risk.

Due to the specific nature of the Fund's activities following its establishment in December 2005, involving clarifications on legal matters resulting from the transfers of shares from the State, rather than active trading in the portfolio shares, a passive risk management approach was adopted by the Fund from its inception until the commencement of Fund Manager's contract on 29 September 2010. In this earlier period no formal risk policies and procedures were in place.

Starting from 29 September 2010 the Fund Manager implemented financial risk management procedures consistent with those applied globally by Franklin Templeton Investments.

(a) Market risk

Market risk is the risk that changes in market prices and rates, such as equity prices, interest rates and foreign exchange rates will affect the Fund's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

(i) Equity price risk

Equity price risk is the risk that the value of an equity instrument will fluctuate as a result of changes in market prices, whether caused by factors specific to its issuer or factors affecting all instruments traded in the market

Equity price risk arises from changes in the value of available-for-sale equity securities and is the primary risk impacting the Fund. Diversification across securities and industries, to the extent possible given the unique investment mandate, is the primary technique for mitigating equity price risk. The Fund has concentrated exposure to the Power Utilities, Oil and Gas, and Power and Gas Utilities industries.

The companies in which the Fund holds equity securities operate in different industries.

The Fund's exposure to industries was as follows:

The Fund has equity investments of RON 4,768,466,068 at 31 December 2011 (31 December 2010: RON 4,846,321,942) which are listed on the Bucharest Stock Exchange (at either BSE or RASDAQ segment) or Vienna Stock Exchange. For such investments, a ten percent increase in the BET-C, respectively ATX index at the reporting date would have increased equity by RON 422,823,955 after tax (2010: RON 384,571,201); an equal change in the opposite direction would have decreased equity by RON 422,823,955 after tax (2010: RON 384,571,201). The analysis is performed on the same basis for 2010.

(ii) Interest rate risk

The Fund places cash into fixed rate bank deposits original maturities of more than one month and less than six months and into treasury bills.

At the reporting date the interest rate profile of the Fund's interest-bearing financial instruments was:

Fixed rate instruments	31 December 2011	31 December 2010

(iii) Currency risk

The Fund is exposed to currency risk on current accounts and deposits held with banks and receivables and payables that are denominated in foreign currencies, i.e. euro (EUR) and U.S. dollars (USD), but the balances were not significant during the reporting period.

The local currency depreciated compared to the EUR (from 4.2848 RON/EUR at 31 December 2010 to 4.3197 at 31 December 2011) and compared to the USD (from 3.2045 RON/EUR at 31 December 2010 to 3.3393 at 31 December 2011).

(iii) Currency risk (continued)

A ten percent strengthening of the RON against the EUR at 31 December would have increased (decreased) profit or loss by the amount shown below. This analysis assumes that all other variables remain constant. The analysis was performed on the same basis for 2010.

Profit or loss	31 December 2011	31 December 2010
EUR	(176,116)	738.788

As at 31 December 2011, the Fund held equity investments denominated in Euro with a fair value of EUR 38,463,298 (RON 166,149,792 equivalent).

(b) Credit risk

Credit risk is the risk of financial loss to the Fund if counterparties to financial instruments fail to meet their contractual obligations, and arises principally from cash and deposits with banks, treasury bills, dividends receivable and receivables in respect of equity contributions. The Fund's maximum exposure to credit risk from cash and deposits with banks was RON 298,269,474 at 31 December 2011 (31 December 2010: RON 1,078,471,177).

4. Financial risk management (continued)

(b) Credit risk (continued)

(i) Cash and deposits with banks

Current accounts and deposits are held with banks in Romania.

The Fund Manager established a formal policy regarding bank counterparty risks and limits. The Fund only establishes new deposits with financial institutions with credit ratings above investment grade. The counterparty credit risk is also diversified by allocating the cash and cash equivalents across several banks. The selection of financial institutions as deposit takers was made and the exposure limits were decided upon based on their credit ratings.

(ii) Treasury bills

The Fund's maximum exposure to credit risk from treasury bills was RON 195,919,673 at 31 December 2011 (31 December 2010: RON 248,021,476).

As of 31 December 2011, the Fund held the following treasury bills with discount, denominated in RON:

(iii) Dividends receivable

The Fund's maximum exposure to credit risk from dividends receivable was RON 52,479,298 at 31 December 2011 (31 December 2010: RON 4,069,237).

Dividend income is recognised in the income statement on the ex-dividend date (listed equity securities) or on the date dividends are declared (unlisted equity securities). In 2006, several companies paid dividends for the year ended 2005 to the State authorities from which the Fund received its shareholdings at its establishment, instead of making such payments to the Fund, as shareholder at the date when the dividends were declared.

4. Financial risk management (continued)

(b) Credit risk

(iii) Dividends receivable (continued)

The Fund initiated legal proceedings to recover such dividends. At the end of 2010 and 2011, the Fund recognised impairment losses on such dividends for which recoverability was not certain.

(c) Liquidity risk

Liquidity risk is the risk that the Fund will not be able to meet its financial obligations as they fall due. The Fund's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Fund's reputation.

The following are the residual maturities of the Fund's financial assets and financial liabilities:

4. Financial risk management (continued)

(c) Liquidity risk (continued)

The Fund's equity investments include unlisted securities, which are not traded in an organised public market and generally may be considered be illiquid. As a result, the Fund may not be able to liquidate quickly some of its investments in these instruments in order to meet its liquidity requirements, or to respond to specific events such as deterioration in the credit worthiness of any particular issuer.

The Fund's listed equity securities are listed on the Bucharest Stock Exchange or on the Vienna Stock Exchange. However, not all listed shares are considered liquid due to insufficient volumes of transactions.

(d) Taxation risk

On 1 January 2007 Romania became a member of the European Union ("EU") and therefore has to apply detailed and complex rules on the basis of the EU Treaties, Regulations and Directives. The Fund has to conform to EU legislation from 1 January 2007 and, therefore, it has prepared to apply the changes arising from the EU legislation. These changes have been implemented, however the tax authorities have up to 5 years to audit the way these changes were implemented.

Interpretation of the text and practical implementation procedures of the newly enforced EU tax regulations could vary, and there is a risk that certain transactions, for example, could be viewed differently by the tax authorities as compared to the Fund's treatment.

Furthermore, the Romanian Government has a number of agencies that are authorized to conduct audits (controls) of companies operating in Romania. These controls are similar in nature to tax audits performed by tax authorities in many countries, but may extend not only to tax matters but to other legal and regulatory matters in which the applicable agency may be interested. It is likely that the Fund will continue to be subject to regular controls as new laws and regulations are issued.

(e) Operating environment

The process of risk repricing during 2007 and 2008 as well as during the second part of 2011 in the international financial markets severely affected the performance of those markets, including the Romanian financial market, and fostered heightened uncertainty with regard to economic developments going forward.

The ongoing global credit and liquidity crisis which commenced in the middle of 2007 has resulted in, among other things, lower level and difficult access to the capital market funding and lower liquidity levels across the Romanian banking sector.

(all amounts are in RON unless otherwise stated)

4. Financial risk management (continued)

(e) Operating environment (continued)

Such ongoing fears that the deteriorating financial conditions could contribute, at a later stage to a further retrenchment in confidence, prompted a coordinated effort of governments and central banks to adopt special measures aimed at countering a vicious circle of growing risk aversion and to helping minimise the effects of the financial crisis and finally restoring normal market functioning. However, political and economic turmoil in the emerging markets is expected to continue, and this can impact the value of the Romanian economy, and consequently the Fund's portfolio companies and its shares.

Management is unable to predict all developments which could have an impact on the Romanian financial sector and consequently what effect, if any, they could have on these financial statements.

Management is unable to reliably estimate the effects on the Fund's financial statements of any further deterioration in the liquidity of the financial markets, devaluation of financial assets influenced by the illiquid credit market conditions and the increased volatility in the currency and equity markets.

(f) Operational risks

Operational risk is the risk of direct or indirect loss arising from a wide variety of causes associated with the Fund's processes, personnel, technology and infrastructure, and from external factors other than credit, market and liquidity risks such as those arising from legal and regulatory requirements and generally accepted standards of corporate behaviour. Operational risks arise from all of the Fund's operations.

The Fund's objective is to manage operational risk so as to balance the avoidance of financial losses and damage to the Fund's reputation with overall cost effectiveness and to avoid control procedures that restrict initiative and creativity.

(g) Capital management

Fund's policy is to maintain a strong capital base so as to maintain shareholders' confidence and to sustain future developments.

The Fund's capital (shareholders' equity) comprises share capital, fair value and other reserves and retained earnings. The shareholders' equity was RON 11,717,633,364 at 31 December 2011 (31 December 2010: RON 12,463,427,009).

The Fund was not subject to externally imposed capital requirements.

17. Receivables in respect of equity contributions

This receivable in respect of equity contributions is the difference between the amount due from Ministry of Public Finance following the cancellation of the contribution corresponding to the holding in Electromecanica Ploiesti S.A. (after the decision of the High Court of Cassation and Justice, which irrevocably rejected in May 2011 the request of the Fund to be registered as a shareholder of this company), amounting to RON 21,436,245, and the cash and equity received from Ministry of Public Finance, not converted into share capital, amounting to RON 11,434,941, as follows:

- cash representing amounts recovered from the forced execution of World Trade Center SA in 2010, for a total amount of RON 9,395,641;
- shares contributed in kind by the State following the increase of the share capital of Plafar SA in 2010, for an amount of RON 334,740;
- shares contributed in kind by the State following the increase of the share capital of Hidroelectrica S.A. in 2011, for an amount of RON 1,704,560.

The Fund recorded an impairment adjustment for the entire remaining amount receivable in respect of equity contributions as at 31 December 2011, of RON 10,001,304 (31 December 2010: nil).

(all amounts are in RON unless otherwise stated)

18. Equity investments

In accordance with Law 247/2005, as amended by Government Emergency Ordinance 209/2005, the Fund received, at its establishment on 28 December 2005, shares in 117 companies as contribution in kind from the Romanian State, as sole shareholder.

In June 2007, Government Emergency Ordinance 81/2007 came into force, in accordance with which:

- 32 new shareholdings were added to the Fund's portfolio as contribution in kind to its share capital (21 shareholdings in companies already in the portfolio and 11 shareholdings in companies not previously in the portfolio);
- 39 shareholdings were removed from the Fund's portfolio and transferred back to the State.

The valuation of the shares contributed by the Romanian State in December 2005 and June 2007 was performed in October 2007 by an independent evaluator (Finevex S.R.L. Constanta), who followed the valuation methodology set forth by Government Emergency Ordinance 81/2007.

The value of the shareholdings, as determined by the evaluator, represents the cost of the equity investments.

Equity investments are available-for-sale financial assets and are carried at fair value, except for the investments whose fair value cannot be reliably measured, which are carried at cost less impairment.

Fair values at 31 December 2011 and 31 December 2010 were determined by reference to published bid price quotations on the stock exchange where shares are traded, where applicable.

Equity investments listed on the Bucharest Stock Exchange which are not actively traded, and unlisted securities, are carried at cost less impairment.

At 31 December 2011 and 31 December 2010, for equity investments carried at cost, no fair values could be determined using valuation techniques as the range of reasonable fair value estimates was significant and the probabilities of the various estimates could not be reasonably assessed.

The movement in the carrying amounts of equity investments is as follows:

During 2011, the Fund increased its exposure to Alro S.A., Azomures S.A., BRD Groupe Societe Generale S.A. and Conpet S.A. The Fund also added three new holdings to its portfolio: Banca Transilvania S.A, Erste Group Bank AG and Raiffeisen Bank International AG.

Additionally, the Fund received 170,456 free shares in Hidroelectrica SA accounted for as contributions in kind to share capital of the Fund (at the nominal value of 10 RON/share). These free shares were received following the application of the provisions of Government Emergency Ordinance ("GEO") 81/2007. The source of the increase in share capital is the land for which the company obtained title deeds.

During the same period the Fund sold its entire holdings in Marlin SA, Familial Restaurant S.A., Laromet S.A. and Zamur S.A., through public auctions, at prices exceeding carrying values and its entire holding in Vitacom S.A. and part of its holding in Oil Terminal S.A. on the open market. Also, the Fund disposed of its shares held in Comcereal Harghita S.A. at the price approved by the General Shareholders Meeting of the company during the delisting process from the Bucharest Stock Exchange and its holding in Retizoh as result of the liquidation of this company.

The High Court of Cassation and Justice rejected irrevocably the request of the Fund to be registered as a shareholder of Electromecanica Ploiesti S.A. Following this irrevocable decision, the Fund issued a decision stating that the Romanian State represented by the Ministry of Public Finance did not fulfil the obligation to transfer the shares in this company and the holding in Electromecanica Ploiesti S.A, amounting to RON 21,436,245, was derecognised from Fund's portfolio.

18. Equity investments (continued)

In July 2011, the merger of Electrica Furnizare Transilvania Nord S.A., Electrica Furnizare Muntenia Nord S.A. and Electrica Furnizare Transilvania Sud S.A. to create Electrica Furnizare S.A. was completed by the Trade Register. The Fund holds 22% of the new company.

In November 2011, the General Shareholders Meetings of Primcom S.A., Delfincom S.A. and Prestari Servicii S.A. approved the merger of these three companies, with Primcom S.A. as absorbing company while Delfincom S.A. and Prestari Servicii S.A. were the absorbed companies. The payables in respect of equity contributions are non-interest bearing financial liabilities representing the consideration paid (in cash or in kind) by the significant shareholder of the Fund (the Romanian State, represented by the Ministry of Public Finance) with the intention of converting these into share capital via a future share capital increase.

As of 31 December 2010, the balance of RON 9,730,381 comprised:

- cash contributions, representing amounts resulted from partial recovery of receivables from World Trade Center Bucuresti SA by the Fund, in a total amount of RON 9,395,641, as follows: RON 8,724,887.92, EUR 148,700.76, USD 10,130.69, amounts transferred based on provisions of G.E.O. nr. 81/2007.
- shares contributed in kind by the State in amount of RON 334,740.

As of 31 December 2011, the balance was nil, as these contributions partially offset the receivable in respect of equity contributions recorded during 2011 (see note 17).

In April 2011, the Fund's General Shareholders Meeting approved the distribution of a gross dividend of RON 0.03141 per share, payable to shareholders with effect from 30 June 2011, which represented the distributable profits of 2010. As at 31 December 2011, shareholders had collected 99% of this dividend

The Fund's General Shareholders Meeting in September 2010 approved the distribution of a gross dividend of RON 0.0816 per share, payable to shareholders with effect from October 2010 which represented the distributable profits of both 2008 and 2009. As of 31 December 2011, shareholders had collected 99% of all dividends whose distribution started before 31 December 2010 (31 December 2010: 98%).

The commission due to National Securities Commission ("CNVM") arose following the Fund's registration with this authority in August 2010.

23. Shareholders' equity

(a) Share capital

As of 31 December 2011, the authorised and issued share capital comprised 13,778,392,208 ordinary shares at a nominal value of RON 1 per share out of which 370,823,112 shares were unpaid.

Unpaid share capital represents the net value of certain contributions due from the Romanian State represented by the Ministry of Public Finance, as shareholder, to the Fund that were recorded in previous years as paid capital (based on Law 247/2005, with subsequent amendments).

During 2011 some of the paid capital has been transferred to the unpaid share capital as explained, as follows:

- Romanian State represented by the Ministry of Public Finance did not fulfil the obligation of the transfer of 1,002,301 shares of Electromecanica Ploiesti S.A. to the Fund, according to the provisions of G.E.O.81/2007, in amount of RON 21,436,245; the High Court of Cassation and Justice irrevocably rejected in May 2011 the request of the Fund to be registered as a shareholder of Electromecanica Ploiesti S.A. (transfer to unpaid share capital recorded based on Fund Manager's Decision 24/31 May 2011):
- Romanian State represented by the Ministry of Public Finance did not fulfil the obligation of the transfer of 2,951,053 shares of Uzina Mecanica Bucuresti SA to the Fund, according to the provisions of G.E.O. 81/2007, in amount of RON 20,024,890; the High Court of Cassation and Justice irrevocably rejected in October 2011 the request of the Fund to be registered as a shareholder of Uzina Mecanica Bucuresti S.A (transfer to unpaid share capital recorded based on Fund Manager's Decision 35/23 August 2011).

(all amounts are in RON unless otherwise stated)

23. Shareholders' equity (continued)

(a) Share capital (continued)

- Romanian State represented by the Ministry of Public did not fulfil the obligation of the transfer of 19,226,031 shares of Nuclearelectrica S.A. to the Fund, according to the provisions of Law 247/2005, in amount of RON 340,796,918 (transfer to unpaid share capital recorded based on Fund Manager's Decision 36/23 August 2011);
- Compensation of the amounts recovered from the forced execution of World Trade Center SA and from the increase of share capital of Plafar SA in previous year, in amount of RON 9,730,381 (compensation recorded based on Fund Manager's Decision 34/23 August 2011);
- Compensation of the value of the 170,456 shares in Hidroelectrica SA received by the Fund free of charge according to GEO 81/2007 in 2011, in amount of RON 1,704,560 (compensation recorded based on Fund Manager's Decision 51/23 December 2011).

The shares unpaid did not entitle their holder to vote or to receive dividends.

At 31 December 2010, the authorised and issued share capital comprised 13,778,392,208 ordinary shares at a nominal value of RON 1 per share, the subscribed share capital of the Fund being recorded as fully paid.

By 31 December 2011, the State's share in Fund's issued capital decreased to 2.71%, out of which 2.69% was unpaid (31 December 2010: the State's share in Fund's issued capital was 38.88%).

The movements in share capital components are presented below:

	Share capital paid in	Share capital not paid in	Total share capital

(b) Fair value reserves on available-for-sale financial assets

The fair value reserves of RON 1,240,275,189 at 31 December 2011 (31 December 2010: RON 1,951,138,494) comprise the cumulative net change in the fair value of available-for-sale financial assets until the investments are derecognised or impaired.

(c) Other reserves

	31 December 2011	31 December 2010
Legal reserve	129,803,203	102,524,308
Other reserves	120,299,556	120,299,557
	250,102,759	222,823,865

As required by the Romanian law, a minimum 5% of the statutory profit for the year must be transferred to the legal reserve. Such annual transfers must be discontinued when the reserve equals 20% of the issued share capital. The legal reserve cannot be used for distributions to shareholders. In 2011, the Fund transferred to the legal reserves an amount of RON 27,278,894 representing 5% of the 2011 statutory gross profit (in 2010: RON 23,369,372).

(d) Treasury shares

The Fund's General Shareholders Meeting in September 2010 approved a buy-back program of up to 10% of the Fund's share capital at prices ranging between 0.2 - 1.5 RON, which is valid until March 2012. The acquired shares can be cancelled and the share capital reduced following shareholders' approval.

The buy-back programme initiated in May 2011 was completed by 30 September 2011. During the programme, 240,304,801 shares equivalent to 1.74% of the Fund subscribed share capital were bought back for a total amount of RON 120,268,583.

At the General Shareholders Meetings on 23/25 November 2011, the Fund Manager proposed to cancel the treasury shares, but the proposal was not approved due to the lack of a quorum (a quorum of at least 50% of paid share capital is required for such a decision). The proposal to cancel these shares will be carried forward to the 2012 shareholder meetings.

e) Dividends

The Fund's General Shareholders Meeting approved in April 2011 the distribution of a gross dividend of RON 0.03141 per share, in relation to 2010 statutory profits.

During 2010 the Fund's General Shareholders Meeting approved the distribution of a gross dividend of RON 0.0816 per share, in relation to 2008 and 2009 statutory profits.

24. Contingencies

As at 31 December 2011 the Fund was involved in certain litigations, either as defendant or claimant. According to the requirements of the IAS 37 "Provisions, Contingent Liabilities and Contingent Assets" the Fund discloses in the financial statements only those which may have significant effects on the Fund's financial position or profitability. The most important litigations were as follows:

1. The Fund is involved in several litigations regarding delay penalties requested from companies which have not yet paid dividends to the Fund for the year 2005 (some of the dividends have since been paid to the Fund pursuant to the Fund winning the law suits). Such litigations are yet to be resolved. During 2011 the most common practice of the Romanian courts was to accept the Fund's claims.

The claims filed by the Fund are in compliance with the provisions of Law 31/1990 as republished and further amended and these amounts should be due and paid to the Fund. These amounts were only be recognised as revenues when their recoverability becomes highly probable (the Court rules irrevocably in Fund's favour).

2. There is currently a court litigation involving the Fund and Nuclearelectrica.

In this file the Fund has sued Nuclearelectrica and the Ministry of Economy and Commerce (now the Ministry of Economy, Trade and Business Environment) and asked the court to record the transfer in the Nuclearelectrica's shareholders register of a total of 20,077,953 shares from the Ministry portfolio to the Fund portfolio in order to update the initial stake of the Fund in Nuclearelectrica, taking into account the share capital increases that took place between 1 February 2006 and 13 November 2007. The litigation was solved at the first stage by the Bucharest Court with the Court ruling against the Fund. The Fund has appealed the decision of the Court and the Bucharest Court of Appeal ruled against the Fund. The Fund will file the second appeal asking High Court of Cassation and Justice to issue the final and irrevocable decision.

For safety reasons, given that the decision issued by the first court in this case is enforceable, the Fund has blocked a total of 340,796,918 shares, in amount of RON 340,796,918 being computed based on valuation report issued in October 2007 by an independent evaluator (Finevex S.R.L. Constanta) for the shares presumed to be owned by the Fund in Nuclearelectrica. The Fund considered that in fact the Ministry of Public Finance has not contributed to the share capital of the Fund with this amount. After the courts will issue an irrevocable decision regarding this case the Fund will propose the shareholders measures in order to solve the issue of unpaid share capital, if it is the case.

As at 31 December 2011 the Fund owned 9.72% of the share capital of the Nuclearelectrica, as recorded at the Trade Register Office.

3. On the role of the courts there are many litigations started by the Fund against the merger plans for creating Hidroenergetica and Electra; in many of these cases the courts have decided to suspend the merger and in two of them the courts ruled in favour of the Fund and decided to block the merger plan. The merger process and the creation of Electra and Hidroenergetica are blocked and the Romanian Government decided to renounce at this project.

(all amounts are in RON unless otherwise stated)

24. Contingencies (continued)

In October 2011, the Romanian Government repealed its previous decision regarding the reorganization of the electricity generation sector for creating Electra and Hidroenergetica and the Government approved as an alternative plan for the restructuring of the electricity generation sector, the creation of Complexul Energetic Oltenia by merging Complexul Energetic Turceni, Complexul Energetic Rovinari and Complexul Energetic Craiova with Societatea Nationala a Lignitului Oltenia.

4. Some minority shareholders of the Fund have filed claims against the Fund with the Court requesting the cancellation of certain resolutions of the General Shareholders Meeting.

Other contingencies of the Fund included:

- 1. The Fund shall receive the following amounts from the Romanian State:
 - a the amount resulted from the trading on the Romanian or foreign stock exchange markets of the first 3% of Romtelecom S.A. shares;
 - b 20% of the amounts resulting from the privatization of Romtelecom S.A.;
 - c 9.9% of the amounts resulting from the privatisation of C.E.C. S.A.

These amounts should be recorded as payments for the unpaid capital or as increases of the share capital by the Romanian state once they are collected, with the approval of shareholders, according to the legislation in force.

2 The receivables from World Trade Center Bucharest S.A.:

Section II, Article 4 of G.E.O. 81/2007 stipulates the transfer from AVAS to the Fund of receivables from World Trade Center Bucharest S.A. amounting to USD 68,814,198 (including the original principal and related interest and penalties) on 29 June 2007.

On 1 October 2007 a reception minute was concluded between AVAS and the Fund based on which all documents related to the receivables due from World Trade Center Bucharest S.A. were transferred to the Fund.

On 4 October 2007, the Fund notified World Trade Center Bucharest S.A. regarding the cession of the receivables. Meanwhile, the transfer was registered with the Electronic Archive for Pledges.

Currently, World Trade Center Bucharest S.A. is the object of insolvency procedure, the next hearing being set for 28 March 2012.

In 2008, World Trade Center Bucharest S.A. paid USD 200,000 to the Fund, in 2009 USD 200,000 and in 2010 USD 110,130.69, EUR 148,700.76, RON 8,724,887.92. No such payments have been made to the Fund during 2011. In accordance with G.E.O. 81/2007, these cash receipts reduced the balance of the receivables in respect of equity contributions.

Given the uncertainties regarding their recoverability, the World Trade Center Bucharest S.A. receivables were recognised on receipt basis in the Fund's financial statements.

26. Subsequent events

Voting rights restriction cancellation

On 23 November 2011 the Extraordinary General Shareholders Meeting approved a number of amendments to the Constitutive Act, one of the most important being the cancellation of the restriction of voting rights.

The new Constitutive Act with the restriction rights cancelled was approved by CNVM on 12 January 2012.

Since 13 January 2011, when the new Constitutive Act became effective, the restrictions of the voting rights related to the number of shares owned by the Fund's shareholders have been eliminated and the principle "one paid share is equal to one voting right" now applies.

A new permanent legal representative of the Fund

On 23 November 2011 the Extraordinary General Shareholders Meeting approved Oana Valentina Truţa as the third permanent legal representative of the Fund. The other two permanent legal representatives are Grzegorz Maciej Konieczny and Adrian Cighi, appointed by shareholders on September 2010.

The appointment is effective beginning with 19 January 2012, the date of the registration with the Trade Register.

26. Subsequent events (continued)

The addendum to the Investment Management Agreement

On 23 November 2011 the Ordinary General Shareholders Meeting approved the Addendum to the Investment Management Agreement. The change refers to the payment of Fund Manager's fees on a quarterly basis, starting 1 January 2012 (previously the fees were paid annually). The calculation of the fees are based on the number shares in issue multiplied by the average market price of the Fund's shares calculated for the respective quarter.

The change of the paid-up capital of the Fund

Since 2 February 2012, the paid-up capital of the Fund increased by RON 4,985,760 to RON 13,412,554,856, while its subscribed capital remained unchanged at RON 13,778,392,208. The increase in the paid-up capital reflects a reduction in the unpaid share capital held by the Romanian state due to the receipt by the Fund of 498,576 shares in Hidroelectrica following a share increase by that company relating to the value of land for which Hidroelectrica obtained title deeds.
