Annex – The proposal to cover the negative reserves incurred in 2018 financial year derived from the cancelation of treasury shares, as presented in the supporting materials and in the Shareholders’ Ordinary General Meeting of Fondul Proprietatea S.A. of 4 April 2019

Sole Director’s Proposal for the Coverage of the Negative Reserve incurred during the financial year ended 31 December 2018

Overview and accounting treatment

Fondul Proprietatea SA (“the Fund”) recognises the treasury shares (i.e. repurchases of own shares and/ or GDRs) at trade date as a deduction to shareholders’ equity (in an equity reserve account). Treasury shares are recorded at acquisition cost, including brokerage fees and other transaction costs directly related to their acquisition. The GDRs bought back by the Fund are accounted for exactly as the own ordinary shares repurchased, as a deduction to shareholders’ equity. This is the result of the application of substance over form principle, due to the fact that buy-back via GDRs is only a technical/ legal form of the transaction, the substance of the transaction being that the Fund buys back its own shares (in view of reducing the share capital by cancelling all treasury shares in the form of shares or GDRS equivalent), giving the same rights to both the holders of the Fund’s ordinary shares and to the holders of the Fund’s GDRs, to take part in the buy-back programmes carried out by the Fund.

Upon completion of all the legal and regulatory requirements (i.e. registration of the share capital decrease with the Trade Registry being the last one, marking also the moment when the cancelation becomes effective), the treasury shares are cancelled and netted off against the share capital and other reserves.

At the cancellation date, only a reallocation between the equity accounts is booked, without any impact on profit or loss or an additional total shareholders’ equity decrease (as compared to the acquisition impact). A negative reserve (equity element) arises upon cancelation of the shares acquired in a buy-back programme, if the acquisition value (trade price and related costs) is higher than the nominal value. However, as mentioned before, this does not generate an additional shareholder’s equity decrease.

The accounting treatment applicable for the recording and cancellation of treasury shares is based on the provisions of the Financial Supervisory Authority Norm 39/ 2015, article 75.

¹For shares subject to cancellation during 2018 and in balance on 16 June 2017 (the date when the Fund's share nominal value decreased by RON 0.05 per share): 90,849,151 shares from 7th buy-back programme and 9,965,829 shares from 8th buy-back programme.

Article 75 from the Financial Supervisory Authority Norm 39/ 2015 mentions that the negative balance arising out of the cancellation of equity instruments may be covered from the retained earnings and other equity elements, in accordance with the resolution of the General Shareholders Meeting.

Sole's Director Proposal for covering the negative reserve

Although there is not an explicit legal or regulatory requirement to cover the negative balance arising out of the cancellation of equity instruments, it is to be noted that the Financial Supervisory Authority Norm 39/ 2015 specifically details how to present it in the financial statements and, further on, the sources that may be used for covering it, in accordance with the resolution of the general meeting of shareholders. From this perspective, and by applying a prudentially regulatory approach, the Sole Director believes there are reasonable arguments supporting the idea that these reserves should be covered and thus proposes to shareholders the coverage of these reserves as follows.

The retained earnings caption as per the Fund's audited statement of financial position as at 31 December 2018 amounts to RON 6,212,247,115 and includes:

• 2016 unallocated profit that remained available to the Fund	350,309,767
• 2017 unallocated profit that remained available to the Fund	725,424,893
• Retained earnings resulted from transition to IFRS 9 starting with 1 January 2018	4,248,175,069
• Profit for the year ended 31 December 2018 less the mandatory transfer to legal reserves	888,337,386
	6,212,247,115

Considering the above, the Fund's Sole Director proposes to shareholders during the 4 April 2019 annual shareholders' meeting that the negative reserves in amount of RON 80,910,369 (as stated in the notes to the annual audited statutory IFRS financial statements and detailed in the table above) resulted from the cancellation of the remaining balance of shares acquired during the 7th buy-back programme and from cancellation of shares acquired during the 8th buy-back programme to be covered from 2016 unallocated profit remained under unallocated retained earnings.
