References

¹ For the period 1 – 29 July 2016

² Annualized rate of return.

³ The NAV per Share Total Return is calculated in RON by geometrically linking total returns for all intermediate periods when official NAV is published. Each total return for a single period is calculated using the following formula: the NAV per share as at the end of the period plus any cash distribution during the period, dividing the resulting sum by the official NAV per share at the beginning of the period. The resulting single period total returns are geometrically linked to result in the overall total return

⁴ The Share Price Total Return is calculated in RON by geometrically linking daily total returns. Daily total return is calculated as the closing price at the end of the day, plus any cash distributions on that day, dividing the resulting sum by the closing price of the previous day. The resulting single period total returns are geometrically linked to result in the overall total return

⁵ The GDR Price Total Return is calculated in USD by geometrically linking daily total returns. Daily total return is calculated as the closing price at the end of the day, plus any cash distributions on that day, dividing the resulting sum by the closing price of the previous day. The resulting single period total returns are geometrically linked to result in the overall total return.

⁶ For the period 4 January – 29 July 2016

⁷ As at 29 July 2016.

⁸ Net cash and receivables includes bank deposits, current bank accounts, short-term treasury bills and bonds, guarantee deposit for tender offer, dividend receivables, receivables from transactions with financial instruments, as well as other receivables and assets, net of all liabilities (including liabilities to shareholders related to the returns of capital) and provisions

⁹ Based on the paid share capital

¹⁰ Includes the 1,125,000 shares, equivalent of the 22,500 Global Depository Receipts of Fondul Proprietatea

¹¹ 363,812,350 shares are unpaid by Ministry of Public Finance

¹² 287,245,107 treasury shares acquired in the sixth buyback program.

Monthly Report

29 JULY 2016

Description of NAV Basis

Net Asset Value is calculated according to regulations currently applying to Fondul Proprietatea, approved by Local Regulator (CNVM Regulation no. 4/2010 as subsequently amended). Where there is trading activity in the last 30 trading days, shares listed on a regulated market are valued at closing price. The shares admitted to trading on AeRO market (alternative trading system) are valued based on the Reference Price method, respectively the average price. Where there is no trading activity in the 30 trading day period for listed investments, the unlisted valuation approach applies. Investments in unlisted companies are valued using either shareholders' equity value per latest annual financial statements (proportionally with the stake held) or by using valuation methods in accordance with International Valuation Standards (fair value principles). Any holding in companies going through an insolvency or reorganization procedure is valued either at zero or at the value provided by an independent valuer, using valuation methods in accordance with International Valuation Standards (fair value principles). Any holding in companies under judicial liquidation procedure, or any other liquidation procedures, as well as in companies under temporary or final suspension of operation, is valued at zero until the procedure is finalised.

Starting with the NAV report as at 29 January 2016, the accounting records under IFRS are used for the computation of NAV non-portfolio items.
