DESCRIPTION OF NAV BASIS

THE CURRENT REGULATIONS

Net Asset Value is calculated according to regulations approved by Local Regulator (FSA Regulations No. 9/2014 and No. 7/2020, as subsequently amended).

Where there is trading activity in the last 30 trading days, the shares listed on a regulated market or admitted to trading on AeRO market (alternative trading system) are valued at closing price. Where there is no trading activity in the 30 trading day-period for listed investments, the unlisted valuation approach applies. Investments in unlisted companies are valued using valuation methods in accordance with International Valuation Standards (according to the fair value principle).

Investments in companies in liquidation, dissolution, bankruptcy, insolvency or judicial reorganization are valued at nil. Investments in companies under temporary or final suspension of operation, are valued at zero until the procedure is finalized.

Starting with the NAV report as at 29 January 2016, the accounting records under IFRS are used for the computation of NAV for the items that are not part of the financial instruments' portfolio (non-portfolio items).

WHAT ARE THE KEY RISKS?

The Fund's portfolio consists mainly of unlisted financial instruments and consequently the performance of the Fund can fluctuate considerably over time.

Risk related to industry sectors: the Fund has a significant exposure in companies in oil, gas and electricity sector. Therefore, the Fund's performance will depend largely on the overall condition of the industries and markets in which the companies in the Fund's portfolio operate.

Risk related to Romania: The Fund holds significant holdings in companies that are controlled by Romanian State. Past experience indicates that management of these companies is often replaced after government changes, which may affect the financial results of such companies in the Fund's portfolio and the Fund's overall performance.

Risk related to Global Pandemic: The spread of infectious diseases, such as COVID-19, could have a significant adverse impact on the Fund's operations and Fund's returns.

Other materially relevant risks are unlisted investment risk, and share discount to NAV risk. For full details of all of the risks applicable to this Fund, please refer to the "Risk Factors" section of the Fund in the current prospectus of Fondul Proprietatea.

Important Information and Disclaimers

The above portfolio information is calculated on the basis of the NAV. The Investment Manager for the Fund reserves the right to withhold release of information with respect to holdings that would otherwise be included in the Top Holdings list where the protection of such information is in the best interests of the Fund. The price of shares and income from them can go down as well as up and you may not get back the full amount that you invested. Past performance is no guarantee of future performance. In emerging markets, the risks can be greater than in developed markets. Investment in the Fund may not be suitable for all investors; we suggest investors seek guidance from a financial adviser. Read the issue prospectus before investing in this fund/investment firm. References

1. The (Discount)/ Premium is calculated based on the latest published NAV at the date of the calculation. For Current Discount/ Premium, the values are calculated based on the 30 April 2023 NAV.

2. For the period: 1 – 30 April 2023.

3. Annualized rate of return.

4. The Performance Inception date for the NAV is 31 December 2010, for the Share Price is 25 January 2011, and for the GDRs is 29 April 2015.

5. The NAV per Share Total Return is calculated in RON by geometrically linking total returns for all intermediate periods when official NAV is published. Each total return for a single period is calculated using the following formula: the NAV per share as at the end of the period plus any cash distribution during the period, dividing the resulting sum by the official NAV per share at the beginning of the period. The resulting single period total returns are geometrically linked to result in the overall total return.

6. The Share Price Total Return is calculated in RON by geometrically linking daily total returns. Daily total return is calculated as the closing price at the end of the day, plus any cash distributions on that day, dividing the resulting sum by the closing price of the previous day. The resulting single period total returns are geometrically linked to result in the overall total return.

7. The GDR Price Total Return is calculated in USD by geometrically linking daily total returns. Daily total return is calculated as the closing price at the end of the day, plus any cash distributions on that day, dividing the resulting sum by the closing price of the previous day. The resulting single period total returns are geometrically linked to result in the overall total return.

8. Net cash and receivables includes bank deposits, current bank accounts, dividend receivables, as well as other receivables and assets, net of all liabilities (including liabilities to shareholders related to the returns of capital and dividend distribution).

9. Based on the subscribed and paid-up share capital as at 30 April 2023 as received from Depozitarul Central SA.

10. 821,068,568 treasury shares acquired in the 13th and 14th buyback programmes.

11. Out of which Fondul Proprietatea held 0 Global Depository Receipts (0 shares equivalent).

12. The own settled shares and shares equivalent of own global depository receipts held by the Fund are excluded from the calculation of the number of voting rights. The repurchased own shares and global depository receipts for which the settlement is ongoing at the date of this report are not excluded from the calculation of the number of voting rights.

13. Distributions since the start of Franklin Templeton mandates.

14. Following the approval during the Ordinary Shareholders' Meeting on 21 April 2023 of the RON 0.05 gross dividend per share, the total dividend payable was recorded in the accounting books on this date and has the effect of reducing the Total Net Assets by the total of the dividend to be paid by the Fund.
